Coventry, UK - May 21, 2025 -
Strongway Gym Supplies has expanded its premium weight training collections in the UK, bringing at-home gym users a range of Olympic barbell weight plates designed for durability, consistency, and long-term performance. The collection includes a variety of plate sizes, all manufactured with precision and built to handle repeated use across all levels of home and garage gym environments. Their rubber-coated finish reduces impact and noise, making them ideal for domestic setups where protecting flooring and minimising disturbance is important.

The Olympic weight plates are compatible with standard Olympic bars and machines, allowing users to load and unload their equipment easily. Whether training for muscle growth, powerlifting, or general fitness, these plates support a wide range of compound and isolation exercises, offering flexibility for all styles of strength work. Their easy-grip design also makes them user-friendly for both beginners and experienced lifters. With clearly marked weights and consistent sizing, the plates ensure a smooth training experience every time. The entire range of weight plate options can be viewed here: https://strongway.co.uk/collections/strongway-olympic-weight-plates.

To complement the plates, Strongway offers a dedicated Olympic barbell collection that delivers the stability and load-bearing capacity serious lifters expect. The barbells are available in different lengths and knurling patterns to suit various lifting styles, including powerlifting, Olympic lifting, and general strength training. Each bar is constructed from hardened steel and engineered to maintain its performance over time, even under regular heavy use. Their smooth spin, balanced weight distribution, and secure grip help prevent slippage and joint strain during repeated sessions.

Together, the Olympic plates and barbells form the backbone of any robust strength training setup. From

squats and deadlifts to bench presses and overhead lifts, the combined use of these collections provides users with a consistent and customisable training experience. The build quality of Strongway?s barbells helps ensure safe lifting, while their spin collars and grip-friendly surfaces make them reliable for those training alone at home. With high compatibility across the brand?s other strength equipment, these bars also support progressive overload over time. For those looking to go beyond the traditional straight barbell movements, Strongway?s Olympic 2" Trap Bar offers an alternative approach to weight training that?s equally effective but often easier on the joints. Also known as a hex bar, this equipment is especially useful for exercises such as deadlifts, shrugs, and farmer?s carries. Its central grip design allows users to lift from a more natural position, reducing strain on the lower back and shoulders while maintaining focus on the legs and glutes.

This makes the trap bar a smart addition for those with mobility concerns or anyone looking to increase training volume without sacrificing form. The dual handles offer versatility in grip position, and its solid steel construction supports heavy lifting across all experience levels. It also promotes proper posture and balance during lifts, making it popular among athletes, beginners, and injury-prone users alike. In combination with Strongway?s Olympic plates and barbells, the trap bar expands the variety of training possibilities, supporting a well-rounded approach to functional strength development.
