

Go Industries Launches New Chevy Winch-Compatible Grille Guards for Enhanced Truck Protection

June 02, 2025

Richardson, TX - June 02, 2025 -
Go Industries is adding to its lineup of truck accessories with the new Medium Duty Grille Guards. These guards are specially designed for Chevrolet C4500, Chevy 6500, Ford F750, F650, and International CV515 trucks. They stand out for their unique features that enhance both protection and accessibility. This new addition highlights Go Industries' commitment to quality and innovation in truck accessories, much like their popular chevy winch grille guards available on their website.

A key feature of the Medium Duty Grille Guards is the no cutting or drilling installation process. This makes it easier for users to upgrade their vehicles without spending too much time or effort. Designed with tilt bodies in mind, the grille guards can articulate forward, making it easier to access the hood. This practical design aligns with Go Industries' goal of delivering high-quality, user-friendly products.

These guards are robust. They have fully welded headlight brush guards made from 1.9" 14 gauge tubing and 2.5" center cross tubes. The center screen is laser cut from 18 gauge material, and the entire guard is

finished with a durable black textured powder coat. These features ensure the guards offer solid protection while maintaining a sleek, professional appearance.

A spokesperson from Go Industries, said, "We are committed to offering our customers the best in quality and innovation. Our Medium Duty Grille Guards are designed to set a new standard for truck accessories, providing sturdy protection and simplified installation. We're proud that all of our products, including these grille guards, are manufactured in the USA, ensuring craftsmanship and reliability."

The grille guard also comes equipped with a winch tray that can hold up to a 16.5k winch. This adds extra functionality for those who need more from their trucks, whether for work or personal use. The inclusion of a secure locking mechanism with two OEM-style latches and safety pins underscores Go Industries' focus on safety and security.

The Medium Duty Grille Guards are designed for several makes and models, including the Chevrolet C4500 and C6500. They offer flexibility in terms of year, make, model, and optional winch carriers. This versatility fits with Go Industries' commitment to meeting diverse customer needs through tailored solutions, such as their chevy winch grille guards.

Fleet managers and individual owners will appreciate the confidence these strong, well-made grille guards provide. Not only do they enhance the look of trucks, but they also help protect against damage on rough terrains.

The spokesperson added, "The development of our Medium Duty Grille Guards builds on decades of expertise in truck protection equipment. These products represent our ongoing dedication to not only meet but exceed industry standards, offering unparalleled quality and reliability to our customers."

Go Industries also offers a range of resources and services to support customers. These include a detailed catalog, product instructions, warranty info, and access to sales and technical support professionals who can help with any questions. These resources help customers make the most of their purchases.

The addition of the Medium Duty Grille Guards, along with the well-known chevy winch grille guards, strengthens Go Industries' leadership in high-quality truck accessories. Anyone interested in these products and other offerings can check out the Go Industries website via their truck accessories page. There, the grille guards are displayed alongside other solutions that improve truck functionality.

This new line of grille guards is part of Go Industries' ongoing mission to meet the changing needs of the

automotive market. They offer products that can handle tough use while delivering top performance. As Go Industries continues to innovate and grow its product range, it remains a trusted name in truck accessories, committed to delivering value and quality to its customers.
