

Vyvo Therapeutics Brings Advanced Microneedling Services to Midland, Texas: A Non-Invasive Solution for Skin Rejuvenation, Collagen Stimulation, and Improved Skin Texture

June 06, 2025

June 06, 2025 -

Midland, Texas ? Vyvo Therapeutics, a trusted leader in innovative health and wellness therapies, is thrilled to announce the addition of microneedling services to its roster of advanced skin care treatments in the Midland area. This non-invasive, highly effective treatment has rapidly gained popularity for its ability to rejuvenate the skin, addressing everything from fine lines and wrinkles to acne scars and stretch marks.

Microneedling, also known as collagen induction therapy, involves the use of fine, sterile needles to create controlled micro-injuries in the skin's surface. This stimulates the body?s natural healing process, boosting collagen and elastin production. The result is smoother, firmer, and more youthful-looking skin. By enhancing the skin's natural regeneration process, microneedling is known to improve skin texture, tone, and appearance, making it a versatile option for individuals with various skin concerns.

At Vyvo Therapeutics, clients can expect personalized consultations with certified specialists who will assess their unique skin care needs and determine the most suitable microneedling approach. This treatment is ideal for individuals seeking to address issues such as acne scars, enlarged pores, uneven skin tone, stretch marks, fine lines, and wrinkles. The clinic's experienced team ensures that each treatment is tailored to meet the individual needs of the client, maximizing results and minimizing downtime.

?We are incredibly excited to introduce microneedling to the Midland community,? said Cathy Graham, APRN,FNP-C at Vyvo Therapeutics. ?Microneedling offers clients an effective and non-invasive option to improve their skin?s appearance. With its proven ability to stimulate collagen production, it?s a fantastic treatment for anyone looking to refresh and rejuvenate their skin.?

One of the key advantages of microneedling is its minimal recovery time. Unlike more invasive procedures, microneedling allows most clients to return to their daily activities immediately following treatment. Although some redness or mild swelling may occur, these effects typically subside within a few hours. Results continue to improve over time as collagen production increases, with optimal results often visible within a few weeks after the procedure.

Vyvo Therapeutics prides itself on using the latest technology in microneedling equipment, ensuring the highest standard of care for each client. The clinic employs state-of-the-art dermal rollers and pens that have been rigorously tested for safety and efficacy. These tools ensure precise and controlled needle depth, which allows for the most effective treatment and minimizes any risk of complications. The team at Vyvo Therapeutics follows strict protocols to ensure that all procedures are carried out in a sterile, safe, and comfortable environment.

?We?ve seen great success with microneedling, and we know that our clients will benefit from the rejuvenating effects it provides,? added Cathy. ?Whether you?re looking to reduce the appearance of scars, minimize fine lines, or simply improve your skin?s overall texture, microneedling can help you achieve your goals.?

Interested clients are encouraged to schedule a consultation to learn more about the treatment and how it can address their specific skin concerns.

Vyvo Therapeutics remains dedicated to providing exceptional care and a wide range of innovative treatments for the Midland community. The clinic?s commitment to staying at the forefront of the latest developments in health and beauty allows it to offer the most advanced services available, including microneedling, facials, and other dermatological treatments.
