

Empower Network Announces Date Of Next Empower Event

February 10, 2016

February 10, 2016 - PRESSADVANTAGE -

Bren & Mike, a well-known super affiliate duo, are happy to announce that the Empower Network, of which they are part, will be holding their next event from April 22 to 24, 2016. The event will take place in Nashville, TN. According to the Empower Network itself, the event will be 'mind blowing' and the duo is encouraging everyone to get a ticket.

Mike Marko, one half of Bren & Mike, says: "Obviously, it's all still very hush-hush. However, insider information tells us that the event will focus on giving people access to breakthrough ideas that have not yet been shared either online or in products. There is currently a discount on tickets, so I really encourage everyone to get theirs while they still can."

Bren & Mike first hit their own fame when they released their Empower Network review. They highlighted how it was this network that enabled them to become successful in affiliate marketing, and the review also discussed the various tools and features that come with the system, and how it benefited them. Since then, they have pushed the Empower Network forward on a near constant basis, continuing to explain how this program can also benefit others as it has done for them. In fact, the duo now provides training to members on

how to get the most out of the system.

Being part of the network, Bren and Mike always attend the network events. "In previous years, we have been absolutely amazed by the information that has been put forward at these events," says Bren, the other half of Bren & Mike. "We have learned about new tools and skills and this has really helped us to become successful. Not just that, the events have also been amazing networking opportunities for both ourselves and our followers. Seriously, you need to get your ticket now because I am sure it is going to be the best network event yet."

Bren & Mike have also highlighted the various Empower Network products. These include the IPAS2 system and the Kalatu blogging system. The network also offers different levels of access, so that people can grow with the system as they improve.
