Daniel Hall Combined Enterprises have released a new course designed to help people add video and audio to their Kindle books to make them "Kindle Interactive Editions". The course can be accessed through <https://www.udemy.com/add-video-audio-to-kindle-books-make-interactive-editions/>. It is already proving to be popular.

"Our course is very specific, which is how to make Kindle books more interactive," says Luanna Rodham from Daniel Hall Combined Enterprises. "As more and more people use Kindle, it is important to stay ahead of the competition by making things more interesting. Adding audio and video is one way to achieve that and by incorporating that in a Kindle book, people will be well on their way towards becoming a bestselling author."

Daniel Hall Combined Enterprises is also drawing attention to the fact that the methods discussed in their course have been proven to be effective. They cite a recent Forbes article, available at <http://www.forbes.com/sites/jaymcgregor/2015/04/17/mark-dawson-made-750000-from-self-published-amazon-books/#4c50e36835e3>. The article describes how Mark Dawson, a self-published Kindle author, was able to receive \$450,000 in payments from Amazon. The article highlights the various tools and techniques Dawson uses, and his belief that being an author also requires a person to be an entrepreneur. This is what the course also teaches those who are aspiring to be successful authors.

The course has over eight lectures and one hour of content. It teaches people specifically how to use the Kindle Textbook Creator software, enabling authors to make their books more interactive and fun.
