### **Busy Bee Lawn Care & Sprinkler Repair Expands Core Services to Additional Columbia Metro Communities**

*June 06, 2025*

WEST COLUMBIA, SC - June 06, 2025 -

Columbia, SC ? Busy Bee Lawn Care & Sprinkler Repair, a well-established provider of lawn care and irrigation services, has announced the official expansion of its primary service offerings to several new communities in the Columbia metropolitan area. Known for its consistent service and strong local reputation, the company will now extend its operations beyond Columbia, West Columbia, and Cayce to include Forest Acres, Rosewood, Shandon, Irmo, Blythewood, and Lake Katherine.

This expansion responds to the growing demand for expert lawn maintenance and irrigation services in rapidly developing and well-established residential neighborhoods. The company has provided lawn mowing, sprinkler repair and installation, yard maintenance, and landscape lighting services since 2006, building a client base through word-of-mouth referrals and high customer satisfaction.

According to Ash Brooks, owner of Busy Bee Lawn Care & Sprinkler Repair, the decision to expand came after observing a consistent rise in inquiries from surrounding communities. ?Many of these neighborhoods are experiencing growth or have long-established properties that require professional upkeep,? said Brooks. ?Bringing our services to areas like Blythewood, Irmo, and Shandon allows us to meet

that need with the same reliability and precision they delivered in Columbia for nearly two decades.?

The company has gained a particular reputation for diagnosing and resolving complex sprinkler system issues. Technicians are experienced in identifying underground leaks, replacing outdated components, and installing efficient irrigation systems using premium products from RainBird and Hunter. These skills are especially relevant in older neighborhoods such as Forest Acres and Shandon, where existing systems may require upgrades. In contrast, newer communities like those in Irmo and Blythewood often benefit from complete custom-designed installations suited to larger properties.

In addition to irrigation expertise, Busy Bee Lawn Care & Sprinkler Repair offers a full suite of lawn care services. These include routine mowing, seasonal yard cleanup, hedge trimming, and detailed edge maintenance. Technicians adjust care plans based on grass type, soil condition, and seasonal factors to support healthy, green lawns throughout the year.

The company also specializes in low-voltage LED landscape lighting, which is particularly sought after in communities like Lake Katherine. Lighting design services enhance both curb appeal and safety, illuminating architectural features, paths, and garden elements. Installations are carried out with long-term durability and energy efficiency in mind.

Busy Bee Lawn Care & Sprinkler Repair has taken steps to ensure its expansion does not impact the quality or consistency of service in any location. Additional staff and equipment have been added to accommodate the broader service area while maintaining fast response times and attention to detail.

Brooks emphasized the importance of retaining the company's commitment to reliable, locally informed service. "Every lawn and landscape is different, especially when expanding across neighborhoods with varying terrain and styles," he said. "Our approach has always been to tailor services to each property's unique needs, and that will remain the standard as we move into these new areas."

Residents in Forest Acres, Rosewood, Shandon, Irmo, Blythewood, and Lake Katherine will now be able to schedule services through the company's website, where they can also request quotes based on their property size and service needs, with free quotes available for lawn service. The company continues to serve both residential and commercial clients and is known for its flexible scheduling options and consistent, courteous customer service.

This expansion reflects Busy Bee Lawn Care & Sprinkler Repair's ability to evolve with the region's residential growth while staying rooted in the professional principles that have guided the business since its founding. By increasing access to high-quality outdoor maintenance services, the company supports the ongoing beautification and upkeep of properties throughout the greater Columbia area.

Busy Bee Lawn Care & Sprinkler Repair's track record of customer satisfaction, combined with its hands-on expertise and use of industry-leading products, has made it a trusted choice for property owners seeking reliable lawn and irrigation care.
