

Sarkinen Industrial Pipelining Expands Mainline Repairs with Innovative No-Trenches Techniques

June 17, 2025

VANCOUVER, WA - June 17, 2025 -
Sarkinen Industrial Pipelining, a leader in trenchless technology, is expanding its services to meet the growing demands of customers in Washington and Oregon. Known for their innovative approaches and quality service, they provide a range of solutions including cured-in-place pipelining (CIPP), closed-circuit television (CCTV) inspections, and hydro jetting drain cleaning. This move is intended to improve service delivery, keeping pace with the latest advancements in pipe repair and maintenance.

Sarkinen Industrial Pipelining is committed to using the latest technology to efficiently handle complex pipeline issues. One standout method they offer is CIPP Pipe Lining, a technique that restores pipes measuring from 4 to 24 inches in diameter without the hassle of digging. Using modern UV or steam curing methods, the company repairs damaged pipes with minimal disruption. Details about their innovative methods can be found on their review page.

A representative from the company stated, "We are thrilled to expand the availability of our services, which

are designed to provide our clients with reliable, long-lasting solutions without the stress of major excavations. Our focus on technology and efficiency allows us to address various pipe issues swiftly, ensuring our clients can return to normal operations with minimal interruptions."

The company also excels in providing top-notch vac truck services for maintaining storm, sewer, and wastewater systems. These powerful vacuum trucks are crucial for hydro jetting drain cleaning, pipe cleansing, descaling, and root removal. These services help keep pipelines clear and functioning smoothly. More information about these essential services can be found on Sarkinen Industrial Pipelining's review page.

Sarkinen Industrial Pipelining is also well-regarded for their robotic pipeline cutting services. By using advanced Schwalm robotic systems, they can remove blockages without digging up the site. This method quickly clears obstacles like concrete or steel, speeding up repair times and minimizing inconvenience.

Their services in trenchless mainline repair and jetting include steam-cured pipe lining, UV spot repairs, and T-Liners for fixing lateral connections. By focusing on these advanced techniques, they serve a wide range of clients, including municipalities and private homeowners associations.

In the past year, Sarkinen Industrial Pipelining earned recognition for adhering to top market standards and safety certifications. This includes OSHA training and protocols for confined spaces, showing their commitment to safety and quality in pipeline solutions.

Their extensive offerings have led to numerous five-star reviews, highlighting their expertise and customer service. One testimonial praised the company's professionalism and effectiveness in solving tough pipe issues, demonstrating their valuable impact in the field.

In conclusion, a company representative noted, "Our dedication to excellence in the pipelining industry drives us to continually improve and adapt. We strive to offer our clients the best possible service by leveraging the latest technology and methods in every job we undertake."

Sarkinen Industrial Pipelining remains a key player in the pipe repair industry, constantly evolving and expanding their services to deliver comprehensive solutions for clients in Washington and Oregon.
