Coventry, UK - June 13, 2025 -
Strongway Gym Supplies has unveiled an expanded collection of Olympic weight plates tailored for home gym owners and dedicated weight lifters seeking to build a versatile training space. These plates are crafted with durability in mind, providing a reliable option for users who want to focus on progressive strength training without the wear and tear that comes with standard weight sets. The collection offers a range of weight increments, allowing fitness fans to gradually increase their resistance levels in accordance with their training goals.

Each plate in this range is made to fit standard Olympic bars, making them a reliable choice for a wide mix of barbell lifts, from squats and bench presses to deadlifts and overhead movements. Built with a focus on longevity, these plates are tough enough to resist cracking, chipping, or general wear, giving home gym users confidence that they?ll last through years of regular and intense training.

Their smooth finish and consistent size mean they slide easily onto Olympic bars without fuss, helping to keep workouts flowing safely and without interruptions. As more people turn to weightlifting as part of their home fitness routine, having dependable bumper plates like these forms a solid base for building strength over time. Alongside the weight plates, Strongway has expanded its range with a selection of Olympic bars designed to meet the needs of both beginners and experienced lifters. Built to handle serious weight without bending or losing their spin, these bars offer lasting reliability for anyone training at home. They?re suited to various movements, including deadlifts, squats, clean and jerks, and snatches, making them an adaptable addition for those wanting to develop strength, endurance, or lifting technique without stepping into a gym.

What sets these Olympic bars apart is their carefully designed knurling, giving users a firm, secure grip that stays comfortable even during longer, high-rep sessions. The smooth rotation of the sleeves also helps reduce the strain on wrists and elbows, especially for lifters focusing on functional fitness or Olympic-style lifts. Whether used for light warm-ups or heavy working sets, these bars are built to cope with regular long-term use, giving home gym owners peace of mind that their gear will hold up over time.
