Entrepreneurship Essentials Unveils New Venture Development Program to Empower Emerging Entrepreneurs

June 16, 2025

TUCSON, AZ - June 16, 2025 -
Entrepreneurship Essentials is launching a new service, New Venture Development, designed to help entrepreneurs transform their ideas into successful businesses. The program is led by Dr. Greg Watson, who brings over 40 years of experience in entrepreneurship. It's a comprehensive package that addresses the common challenges faced by entrepreneurs starting new ventures. More information about the New Venture Development service and other offerings can be explored on their website.

The New Venture Development service offers a variety of workshops focused on different elements of starting a business. This effort is part of the company's larger goal to provide practical and creative solutions that support the growth and sustainability of entrepreneurial endeavors. Participants have access to workshops that cover bootstrapping, venture finance, and effective rapid prototyping.

"We understand that the path of entrepreneurship can be complex. Our aim is to make this journey easier by providing structured support and empowering entrepreneurs with the necessary tools and guidance," said Dr. Greg Watson, founder of Entrepreneurship Essentials.

But the service is more than just workshops. Entrepreneurs can also connect through Essentials Connect, a global networking platform bringing together entrepreneurs, advisors, and investors. This community is crucial, offering a nurturing environment that encourages learning and collaboration. The program's framework helps in solving problems entrepreneurs often face, such as securing funding and creating a market strategy that clearly shows the value of their products. Details about Essentials Connect can be found on their platform.

Dr. Watson emphasizes the significance of this venture, stating, "Our comprehensive program doesn't just

teach; it uses innovative design to tackle real-world challenges. We're aiming to open up opportunities for budding entrepreneurs, helping them move confidently from vision to reality."

Participants also benefit from private coaching sessions that provide tailored support to address specific challenges they may encounter at different stages of their journey. The New Venture Development service aligns with other offerings from Entrepreneurship Essentials, such as Digital Marketing, Corporate Innovation, and Leadership Development. This combination ensures that entrepreneurs are prepared not only to start a business but also to adapt and compete in ever-changing markets.

The program has a strong focus on inclusivity, aiming to empower women and diverse communities in entrepreneurship by providing them with valuable insights and opportunities. Beyond the nuts and bolts of strategy and financial planning, the core of the New Venture Development service is about boosting personal drive and fostering a mindset ready for growth. It guides entrepreneurs through the five stages of launching a business: Ideate, Build, Launch, Compete, and Scale, ensuring no one feels unsupported.

For those who find themselves stuck or need a more systematic approach to launch their ideas, the New Venture Essentials course and small-group mastermind offer additional resources. These tools are designed to provide clarity, direction, and the necessary resources to progress in their entrepreneurial journey.

Entrepreneurship Essentials continues to support the potential of emerging entrepreneurs. Through structured guidance and community support, they play a vital role in promoting the creation of innovative and impactful businesses. Business owners and aspiring entrepreneurs are encouraged to explore how they can benefit from the New Venture Development service to achieve their business goals. More information is available on their official website.
