agileKRC Launches New AgilePM Practitioner v3 Course in London, June 2025

July 01, 2025

LONDON, UK - July 01, 2025 -
agileKRC, a leading provider of agile project management training, has announced the launch of their updated AgilePM Practitioner v3 course in London, England this June 2025. The comprehensive training programme is designed to equip project management professionals with the latest skills and methodologies in agile project delivery. This significant update to the AgilePM Practitioner certification addresses the evolving needs of organisations seeking to implement agile frameworks more effectively in their project environments. The course targets existing project managers, AgilePM Foundation certificate holders looking to advance their qualifications, beginners taking the combined Foundation and Practitioner course, teams transitioning to agile methodologies, and professionals aiming to enhance their career prospects through internationally recognised credentials in AgilePM Practitioner v3.

"The launch of our updated AgilePM Practitioner v3 course represents a significant milestone in our commitment to delivering world-class agile project management training," said Jay Gao, Operations Manager at agileKRC. "We have carefully refined our teaching methodologies and course materials to align with the latest AgilePM v3 framework, ensuring our students receive the most current and relevant knowledge in the field. Our exceptional track record speaks for itself, with 99% of our students passing the Practitioner exam

on their first attempt." Gao emphasised that the new course incorporates practical applications and real-world scenarios, enabling participants to immediately apply their learning in professional settings. The updated curriculum reflects the changing landscape of project management, where agility and adaptability have become essential skills for delivering successful projects in increasingly complex environments.

Detailed information about the new AgilePM Practitioner v3 course is available on the agileKRC website. Professionals interested in enhancing their project management capabilities can explore the various training options, including instructor-led courses and self-paced online learning. The website provides comprehensive information about course content, examination details, and scheduling options for both the standalone Practitioner course and the combined Foundation and Practitioner programme. agileKRC has designed flexible learning pathways to accommodate different learning preferences and professional commitments. The course materials include the Agile PM handbook v3, sample examination papers, and access to agileKRC's Business Learning Library, providing students with extensive resources to support their learning journey. The company's commitment to student success extends beyond the classroom, with ongoing support available throughout the certification process.

"What truly sets our AgilePM Practitioner v3 training apart is our innovative approach to learning," explained Jay Gao. "We have incorporated interactive simulations and practical tools that maximise learning outcomes and ensure students can confidently apply agile methodologies in real-world scenarios." The updated course has received positive feedback from industry professionals who have participated in preliminary sessions. According to the Agile Business Consortium, which oversees the AgilePM certification, the v3 update represents a significant advancement in agile project management methodology, addressing the evolving needs of organisations in an increasingly digital business landscape. The consortium has highlighted the importance of certified training providers like agileKRC in maintaining high standards of professional development in the field. Students who successfully complete the course and pass the examination receive a three-month complimentary membership to the Agile Business Consortium, providing them with additional resources and networking opportunities.

The launch of the AgilePM Practitioner v3 course comes at a crucial time for the project management profession, as organisations across sectors increasingly adopt agile methodologies to navigate complex and rapidly changing business environments. Industry analysts predict that demand for certified agile project management professionals will continue to grow significantly over the next five years, with AgilePM certification becoming a standard requirement for senior project roles. The updated v3 framework addresses emerging challenges in project delivery, including remote team management, integration with traditional project methodologies, and alignment with enterprise agility initiatives. By offering both intensive instructor-led training and flexible self-paced online options, agileKRC is well-positioned to meet the diverse needs of the market. The company's award-winning status, independently verified as a leader for Agile Project Management training in the Trusted Training Radar® reports for three consecutive years,

underscores its reputation for excellence in the field.
