

DIDlogic Achieves Official Registration with Germany?s Bundesnetzagentur, Strengthening European Compliance Framework

June 24, 2025

NEW YORK, NY - June 24, 2025 -

DIDlogic, a global provider of enterprise-grade telecom services, has been formally registered with Germany?s federal telecommunications authority, Bundesnetzagentur. The registration, issued under §5 of the German Telecommunications Act (TKG), confirms DIDlogic?s inclusion in the country?s official telecom register under registration number 25/067. This development marks a pivotal compliance milestone as the company continues to expand its international presence.

The Bundesnetzagentur listing certifies that DIDlogic has fulfilled all legal obligations necessary to provide publicly accessible telecommunications services in Germany. These services include number-based voice communication, number-based messaging, and data transmission offerings. The registration enables DIDlogic to commercially provide and resell these services within the German market via copper cable-based infrastructure. It is important to note that DIDlogic does not operate physical public telecom networks in Germany; the registration applies solely to service delivery under its brand.

While Germany does not issue traditional telecom licenses for service providers, registration with the federal regulator is mandatory. The confirmation from Bundesnetzagentur serves as a declaratory notice that DIDlogic?s disclosures have been submitted in full and in accordance with national legislation. It does not imply a discretionary grant of permission but rather affirms compliance with Germany?s regulatory requirements.

Germany is widely recognized as the European Union?s most complex and closely monitored telecommunications market. The country?s regulatory framework demands high levels of transparency, technical accuracy, and legal clarity. DIDlogic?s successful registration is a strong signal of its operational maturity and readiness to serve businesses operating in high-regulation environments. It is also a continuation of the company?s strategic commitment to meeting jurisdiction-specific compliance standards, building upon its already completed registration in similarly stringent markets such as Singapore.

DIDlogic?s listing in the German registry demonstrates a deliberate and long-term investment in regulatory alignment. It sends a clear message to enterprise clients, infrastructure partners, and government bodies that the company is both prepared and qualified to operate in jurisdictions with the most demanding oversight. In an industry where the legal and technical landscape varies widely from country to country, such compliance is not just a legal requirement ? it is a competitive advantage.

For global enterprises seeking voice and messaging providers capable of supporting international expansion, regulatory posture is becoming a primary factor in the decision-making process. The telecom space is experiencing heightened regulatory scrutiny worldwide, and providers that cannot demonstrate compliance across multiple regions often face delays, limitations, or reputational risks. With its registration in Germany now publicly listed, DIDlogic enhances its position as a preferred partner for organizations prioritizing transparency, reliability, and lawful operations.

?Our registration with Bundesnetzagentur is more than a checkmark. It?s a reflection of how seriously we take our regulatory responsibilities,? said Alex Kloc, Sales Director at DIDlogic. ?Customers in Germany and across Europe deserve service providers that are legally sound, transparent, and technically dependable. This milestone reaffirms our commitment to meeting those expectations.?

This achievement is part of a broader compliance strategy that will continue to guide DIDlogic?s growth. As the company expands into new territories and evolves its offerings, regulatory alignment will remain one of its foundational pillars. Future plans include additional regional registrations and further investment into legal infrastructure to support long-term service delivery across APAC, Europe, and the Americas.

For those interested in reviewing the official listing, DIDlogic?s public registration can be found in the

Bundesnetzagentur online registry. To learn more about the company?s compliance initiatives or to request documentation, customers and partners are encouraged to reach out to the DIDlogic team directly.

About DIDlogic

DIDlogic is a global provider of enterprise telecommunications services, offering SIP trunking, voice termination, DID numbers, and SMS capabilities for businesses and carriers worldwide. With a focus on technical flexibility, legal transparency, and infrastructure reliability, DIDlogic supports modern communications across the globe. The company maintains regulatory registrations in key markets and continues to expand its services in line with evolving international standards.
