Local Recovery Center Announces New Facility in Tullahoma

July 08, 2025

Tullahoma, TN - July 08, 2025 -
Tullahoma, TN ? ReVIDA® Recovery is a local addiction recovery organization that provides medication-assisted treatment (MAT) throughout Virginia and Tennessee. This treatment empowers people to heal from opioid use disorder (OUD). ReVIDA® Recovery is focused on providing treatment to as many people in recovery as possible. In March of 2025, they opened a new location to serve the people of Tullahoma.

?Your journey isn?t like anyone else?s, and your treatment shouldn?t be either. At ReVIDA® Recovery, we understand that. Which is why we tailor our treatment plans to fit your needs. You?re not just another patient, you?re a person who deserves to kick opioids to the curb, once and for all.

?Our program addresses the mental and physical toll of opioid use in a safe, welcoming space. Don?t sweat the cost, we?ve got you covered by accepting most commercial insurance and TennCare,? the website begins

At the Tullahoma clinic, ReVIDA® Recovery offers outpatient MAT, individual therapy, group therapy, and

family therapy. Their outpatient treatment schedule is intentionally flexible, so patients with busy schedules at work or home still have the opportunity to receive the care they deserve. ReVIDA® will also work to connect patients with community resources that allow them to build stability during recovery, including childcare, education, and employment services.

?Opioid use disorder stems from continued use of an opioid medication or substance. Opioids latch onto receptors in the brain, giving you that euphoric feeling and numbing the pain. The brain starts to change as use continues, sending signals that indicate the need for more.

?Normally, the brain releases dopamine, known as the feel-good chemical, as a natural response to good experiences, such as eating a good meal. But when opioids take over, that process shuts down and is replaced by the dopamine produced when opioids are present. Opioids become the only thing that can make you feel good.

?That?s when dependence kicks in. When opioids aren?t in your system, the brain essentially goes haywire, causing cravings and withdrawal. Withdrawal comes with symptoms including flu-like runny nose, nausea, muscle aches, and joint pain. This back-and-forth between withdrawal and continued use is the trademark of opioid use disorder,? the website continues.

During treatment, patients meet with three key individuals. First, they meet with their doctor, who will prescribe their MAT medications. Next, they meet with a care coordinator who connects them to resources for recovery. Finally, they?ll meet with a therapist, who will work with them to find the root causes of their OUD.

?You?ve made the courageous decision to step into opioid use disorder recovery, and we?re honored that you?ve placed your trust in us. At ReVIDA® Recovery, we don?t take that lightly. We will be by your side through every challenge, whether you?re just starting out or returning after a setback. Your recovery is our priority, and we?re here to support your goals every step of the way,? the website concludes.

Anyone in the Tullahoma area living with OUD can benefit from a strong MAT program, regardless of how long they?ve been living with their condition. Patients can expect to be seen the day after their initial call or sooner. The Tullahoma clinic is located at 127 Ledford Mill Rd., Tullahoma, TN 37388.

ReVIDA® Recovery has empowered many people to reclaim their lives from opioid use disorders. With locations throughout Tennessee and Virginia, they are easing access to care for Appalachian residents. They utilize Suboxone and Sublocade along with talk therapies to effectively treat opioid use disorders and promote successful recoveries.
