NOLA Detox Expands Addiction Recovery Services With New Slidell Facility Offering Inpatient and Outpatient Treatment

July 08, 2025

NEW ORLEANS, LA - July 08, 2025 -
NOLA Detox and Recovery Center is proud to announce the upcoming opening of a new treatment facility in Slidell, Louisiana. Located at 1444 Lindberg Drive, the new campus will provide both inpatient and outpatient treatment in Slidell, expanding access to quality, compassionate care for individuals struggling with addiction and co-occurring mental health disorders.

This marks a significant step forward in NOLA Detox?s mission to deliver world-class recovery services across Southeast Louisiana. The Slidell location will offer a full continuum of care, from detox and residential treatment to intensive outpatient programs (IOP), with a focus on personalized support and evidence-based practices.

?We are thrilled to bring NOLA Detox?s comprehensive model of care to the Slidell community,? said Chris Copeland, Co-Founder and Chief Operating Officer. ?This region deserves the same high standard of addiction treatment that?s been transformative for so many of our patients in New Orleans. Our goal is to meet people where they are and help them feel better faster with dignity, structure, and support.?

At the heart of NOLA Detox?s inpatient treatment in Slidell is a structured four-phase model designed to support patients through every stage of recovery. From the initial stabilization period, where patients receive 24/7 medical care and begin detox in a safe, welcoming environment, to the Vision phase, where they graduate with a customized post-treatment plan, the program is designed to foster resilience and long-term sobriety.

The inpatient services will address a wide range of substance use issues, including opioid, alcohol, stimulant, and sedative addictions, as well as co-occurring mental health concerns like anxiety and depression. With amenities designed to mirror the comforts of a boutique hotel, the facility provides an atmosphere of respect, privacy, and rest, helping patients heal both physically and emotionally.

The outpatient treatment in Slidell will provide flexibility for individuals who require structured care while continuing to work, attend school, or manage family responsibilities. NOLA Detox?s intensive outpatient program includes a robust schedule of therapy sessions, education workshops, and physician-directed care delivered during day or evening hours.

The IOP model allows patients to participate in recovery without stepping away from their daily lives. Services include medically assisted treatment, individual and group therapy, coping skills development, and access to a peer support network. After completing the IOP, patients continue on a continuum of care that may include follow-ups, family therapy, and community support group connections.

What sets NOLA Detox apart is its uniquely integrated model, which blends medical science, mental health expertise, and Southern hospitality. Every element of care, from medication-assisted treatment to hot cookies and milk served at night, has been thoughtfully designed to support healing and personal transformation.

The treatment philosophy emphasizes comfort, connection, and neurobiological healing. By using evidence-based therapy like Cognitive Behavioral Therapy (CBT) alongside long-acting medications such as Suboxone, Sublocade, and Vivitrol, NOLA Detox helps patients not only achieve sobriety but also restore their physical and mental health.

?Addiction recovery isn?t one-size-fits-all,? said Dan Forman, Co-Founder and Chief Executive Officer. ?What makes NOLA Detox unique is our commitment to meeting patients with both clinical excellence and personal compassion. Our approach empowers individuals to thrive, not just while they?re in treatment, but for the rest of their lives.?
