

NV Energy Program Pays For Air Conditioning Repairs, Cleaning & Maintenance

February 09, 2016

February 09, 2016 - PRESSADVANTAGE -

Las Vegas Air Conditioning, Inc., an HVAC business in Las Vegas, NV, has announced that they are participating in the NV Energy/Exact Comfort AC Repair & Maintenance program. Thus, this summer, residents of Las Vegas and Henderson in Nevada would be able to take advantage of rebates for air conditioning tune-ups and select repairs.

In line with the above, Las Vegas Air Conditioning employees are now getting ready for summer, and homeowners are urged to get on schedule with the instant rebates being applied and covering 100% of the tune-up or repair cost. As such, the company expects to be very busy and this is supported by the fact that the list of homeowners scheduling this free service is already getting backed up. Details are available through <http://lasvegasair.net/>.

Stephen Gamst from Las Vegas Air Conditioning, Inc. says: "We are very excited to have signed up to the NV Energy/Exact Comfort program. We believe it is an opportunity for Nevada residents to have fully functioning HVAC systems at no cost to themselves. At the same time, it is an opportunity to protect the environment by ensuring our energy usage is sustainable."

The NV Energy Program wants the air conditioners in the valley cleaned, tuned and the ducts sealed to lower power consumption and ultimately reduce their own load. With the population growing every year, keeping up with power consumption is getting more difficult, and they have determined it's cheaper to pay for AC repairs and tune-ups than to buy power from outside sources during those peak load hours, as they're currently doing.

This energy program will pay for AC tune-ups, air duct sealing, adding freon, and upgrading to variable speed. This has the goal of lowering power consumption. All pre- and post-performance reports are to be forwarded to Exact Comfort for review before contractors can be paid for this service so doing a good job is in Las Vegas Air Conditioning's best interest.

Las Vegas Air Conditioning is a Las Vegas based heating and air conditioning contractor. It specializes in high quality HVAC equipment and installation. The company was founded in 1969. It has one main building, 36 employees and 27 field vehicles for home response and repair. More details about the company are available on the company's Facebook page.
