

Steroids UK Offers Free Shipping And HGH Bottle With Purchase

February 11, 2016

February 11, 2016 - PRESSADVANTAGE -

SteroidsUK has announced that they now offer free shipping across mainland USA. Additionally, they have changed their payment structure so that anyone who purchases two bottles of their products will receive a free bottle of HGH (human growth hormone) as well. More details are available at <http://steroids-uk.org>.

Roy S. Sledge from SteroidsUK says: "The United Kingdom is a place where bodybuilding is taken very seriously, and where drug laws are incredibly tough. While it is rare, therefore, to find someone who takes illegal steroids, people continue to search for a legal way to achieve the same results, without the nasty side effects. Our stacks offer this alternative, and particularly if taken together with HGH."

SteroidsUK has also launched an active social media campaign through their Facebook page at <https://www.facebook.com/steroidsintheuk>. The company is encouraging everyone to like the page so that they can become involved in the conversation. They use this page to share information about bodybuilding, stacks and HGH and also encourage others to talk about their own experiences.

Many people have already shared their positive experiences on Facebook. "I love the SteroidsUK stack and never go anywhere else," says Peter S. "They don't do one size fits all, but rather have individual stacks suitable for specific athletes. Now that they also offer a free bottle of HGH, I love them even more. I have bulked up tremendously since starting with the SteroidsUK products and am finally at the size I wanted to be."

In conjunction with their Facebook campaign, the company has also launched a Twitter account. This account, which can be accessed at <https://twitter.com/steroidsinuk>, also enables the company to share pieces of news and information. All are encouraged to follow them.

Previously, SteroidsUK has mainly targeted the United Kingdom market. However, they have now expanded their services into this country, thereby enabling more people to try the product out and experience its benefits first hand. While having only recently been released in the US, the stacks already attract a lot of attention from athletes who claim that it is the best thing since sliced bread.
