Patton Myhre Launches New Website Showcasing Integrated Valve & Automation Solutions

August 01, 2025

TOMBALL, TX - August 01, 2025 -
Houston, TX - Patton Myhre Sourcing, LP, a premier midstream valve and actuation supplier serving the oil and gas industry throughout North America for over 20 years, is excited to announce the launch of a newly designed website. The new website reflects Patton Myhre's commitment to operational excellence, integrated manufacturing capabilities, and comprehensive field services, offering an enhanced online experience that meets the evolving needs of midstream energy companies seeking reliable valve solutions.

Patton Myhre Sourcing, LP has established itself as a trusted leader in the midstream oil and gas market, founded by partners Daniel Patton and Bruce Myhre who bring over 50 years of combined experience in procurement, manufacturing, and sales. Operating from their fully integrated 15002 Boudreaux Road facility in Tomball, Texas, the company specializes in supplying a comprehensive range of API 6D valves including ball valves, gate valves, check valves, plug valves, butterfly valves, and control valves, along with complete valve automation solutions. With their "under one roof" approach to value-added services and strategic partnerships with reputable manufacturers, Patton Myhre has built a reputation for delivering quality products with shorter lead times and exceptional customer service. As the company continues to expand its reach across North America while maintaining its commitment to in-house manufacturing excellence, it recognized the need for a modern, professional website that accurately represents its integrated capabilities and industry expertise. To achieve this, Patton Myhre partnered with ASTOUNDZ, an internet marketing firm renowned for its expertise in creating optimized, high-performance websites that deliver results.

"Our goal was to create a website that not only looks professional but also functions seamlessly across all devices," said Steve Winter, founder of ASTOUNDZ. "We wanted to ensure that Patton Myhre's clients have easy access to the information they need, whether they're seeking valve specifications, automation solutions, or comprehensive field services."

The new Patton Myhre website features a sleek, modern design that emphasizes the company's integrated

manufacturing approach and comprehensive service capabilities. ASTOUNDZ applied its "ONE SEARCH, ONE CLICK, ONE COMPANY" philosophy to the design process, ensuring that energy industry professionals can find what they need quickly and efficiently. The site's navigation is intuitive, with clearly defined sections for Patton Myhre's key service areas, including midstream valve supply, custom valve modifications, automation solutions, field services, and their extensive manufacturer partnerships.

"Patton Myhre is all about being your energy products partner, and our website needed to reflect that mission," Daniel Patton. "ASTOUNDZ helped us create a digital presence that not only looks professional but also makes it easier for our clients to understand our integrated capabilities and access our comprehensive valve and automation solutions."

Beyond aesthetics, the new Patton Myhre website is fully optimized for search engines, ensuring that midstream energy companies can easily find the company online when searching for valve and automation solutions. ASTOUNDZ's expertise as an organic SEO company played a crucial role in this aspect of the project. The website is designed to rank highly on search engines like Google, Bing, and Yahoo, driving more traffic and generating more leads for Patton Myhre's specialized services.

"SEO is a critical component of any modern website," Winter explained. "We made sure that Patton Myhre's site is not only visually appealing but also performs well in search results, helping them reach more energy companies throughout North America and grow their valve supply business."

One of the standout features of the new website is its mobile responsiveness. With more energy industry professionals accessing the internet via smartphones and tablets while working in the field, it was essential that the Patton Myhre site provides a seamless experience across all devices. ASTOUNDZ ensured that the website is fully responsive, meaning it adapts perfectly to any screen size, from desktops to mobile phones.

"A great user experience is about more than just design," said Patton. "It's about making sure that our clients can access our services wherever they are, on whatever device they're using. The new website does exactly that, whether someone needs emergency valve replacement or wants to explore our comprehensive automation capabilities."

As Patton Myhre continues to expand its services and serve new markets throughout North America, the new website provides a strong foundation for future growth. The site's backend is built to support ongoing updates and additions, allowing Patton Myhre to keep its content fresh and relevant. This flexibility ensures that the website will continue to serve the company's needs as it grows and evolves in the competitive energy supply industry.
