Minneapolis SEO Company Redesigns Website And Expands Services

February 12, 2016

Golden Valley, Minnesota - February 12, 2016 -
PromoTech Marketing is proud to announce that they have recently redesigned their website and are now expanding their operations into Minneapolis, MN. They have also launched their redesigned website, which fully highlights the various services that they offer. To celebrate, they now also provide a free strategic online session.

Jeff Mork from PromoTech Marketing says: "A lot of businesses have websites that are very pretty to look at. However, the Google robots don't have eyes. This means that a site that may look very beautiful can be classed as ugly by these robots. And when that happens, it doesn't get ranked and all the efforts put into it are basically pointless. We want to make sure our clients have a site that doesn't just look good to clients, but to Google as well and we're excited to roll this out across Minneapolis."

Jeff Mork is uniquely qualified to offer these types of services. He has worked for a variety of different companies in a range of industries, always having a focus on marketing and advertising. He decided to branch out into SEO, something that he has been very successful in. He helped to found PromoTech Marketing and remains a managing partner to this day, always driving the business to achieve greater goals

for their clients.

His work has been greatly appreciated by many. "Jeff is a knowledgeable, courteous, and effective online marketer," says David Vanderwarn, Director of Sales at Triglass Productions. "Constantly educating himself on the ever changing landscape of Reputation Marketing, Jeff is a wise choice for gaining small to medium sized businesses."

PromoTech Marketing is quickly establishing itself as the best SEO company in Minneapolis. They have also recently launched a new video to describe their services and what they can do for their clients. They encourage everyone to take advantage of the opportunity for a free strategic online session, as available on their new website. This will enable prospective clients to gain a greater understanding of their current SEO position, what they need to do in order to improve on that, and what the effects of these improvements could be in terms of their bottom line.
