New Local SEO Packages Offered Across San Diego

February 11, 2016

February 11, 2016 -
An internet marketing company in San Diego, CA, Local SEO Profit, has announced that they have developed a number of new local SEO packages. The company offers a free SEO audit to all prospective clients, and they encourage anyone to request this audit to see what SEO could mean for the bottom line of their business. Those who have used the packages have been overwhelmingly positive about the results.

"Once upon a time, SEO was just one huge thing that everybody could engage in," says Roderick Luna from Local SEO Profit. "The internet is now much too big, however, and if you want to make an impact, you have to start at the beginning, which is your local area. While we offer both national and even global SEO packages, our strongest focus is on local work, not in the least because good local SEO flows into national and global practices as well."

This particular kind of SEO has been designed to help not just businesses that operate solely online, but those that are on the high street as well. Research shows that over 80% of shoppers will use the internet, and particularly their mobile devices, to look up stores they may visit physically before actually doing so. Through local SEO, companies can become noticed by customers who are already looking for them, in other words.

The work completed by SEO service provider have been very well-received. "I am just a high street store,"

says one happy customer. "I didn't really think that being online mattered all that much. I had a simple one page site with some contact details, and that was about it. The guys at Local SEO Profit showed me how important it is even for a business like mine to be online properly, and they were right. They redesigned my website in full, and I have noticed a huge difference in the number of customers who come through my door, with many saying they had seen my site. Well done and thank you to Local SEO Profit."

Localized SEO is a specific skill that the staff at the company have been fully trained in.
