# Electrifying Solutions: Dietz Electric and Orange1 Motors Transforming the Industry

*July 23, 2025*

MILWAUKEE, WI - July 23, 2025 -
Dietz Electric, a renowned authority in electric motor services, is elevating industry standards through its exclusive partnership with Orange1 Motors. Known for blending over five decades of Italian motor engineering excellence with precise American customization and support, Orange1 Motors has become a benchmark for premium industrial motors. Dietz Electric, recognized as a leading Orange1 Motors distributor, is driving innovation by offering enhanced modification services that cater to complex operational demands across diverse sectors including oil & gas, chemical processing, and pharmaceuticals.

Orange1 Motors are synonymous with reliability, advanced engineering, and superior efficiency. Designed in Italy with manufacturing excellence that emphasizes precision and durability, these motors come equipped with IE2, IE3, and IE4 premium efficiency ratings. These ratings ensure optimal energy consumption without compromising performance, fulfilling the increasing global demand for environmentally responsible solutions in industrial applications. By partnering with Dietz Electric, customers benefit from a robust local support system that complements the high standards set by Orange1?s engineering team.

Mark Henson, owner of Dietz Electric, emphasizes the significance of this collaboration, stating, "Our partnership with Orange1 Motors allows us to bring the best of Italian engineering directly to American industries with the customization and certification necessary to meet stringent safety and operational requirements. This is more than just motor distribution; it?s about creating tailored, compliant solutions that empower our customers to operate safely and efficiently."

Dietz Electric?s specialization in flameproof conversions and hazardous location motors certifications exemplifies its commitment to safety and compliance. Motors distributed through Dietz Electric, acquired from Orange1?s Saint Charles, Illinois facility, can undergo precise modifications including ATEX and IECEx certifications essential for operations in explosive atmospheres. This expertise provides companies operating in highly regulated environments with the assurance that their equipment meets all applicable standards

without compromising on operational integrity or warranty coverage.

The comprehensive modification services offered by Dietz Electric extend beyond safety certifications. Custom nameplate applications are meticulously handled to reflect Dietz Electric?s role as the modifier, ensuring traceability and regulatory adherence. This level of detail is vital for industries where documentation and compliance audits are routine, such as pharmaceutical manufacturing and chemical plants. Customers receive fully certified motors that conform to rigorous international and domestic safety mandates, enabling uninterrupted operation in hazardous conditions.

Dietz Electric?s Milwaukee-based facility serves as a strategic hub to ensure rapid turnaround times on both inventory and customized orders. Having established direct connections with Orange1?s local manufacturing base allows Dietz Electric to streamline shipping and reduce lead times typically associated with specialized motor solutions. Businesses relying on critical infrastructure installations find this responsiveness invaluable for meeting tight project deadlines while maintaining safety standards.

The flexibility of Orange1 Motors? modular design is highlighted through Dietz Electric?s ability to provide various mounting configurations without affecting explosion-proof integrity. Whether the requirement is for single-phase or three-phase motors, IEC or NEMA frames, or specialized brake motors, Dietz Electric?s inventory and technical expertise effectively accommodate specific operational parameters. This adaptability makes Orange1 Motors, when distributed and customized through Dietz Electric, a highly versatile choice for a broad spectrum of industrial applications.

Support from Dietz Electric extends well beyond the point of sale. Their ongoing service model includes technical assistance, troubleshooting, and repair capabilities that ensure continued optimal performance. Dietz Electric?s intimate knowledge of both standard and modified Orange1 motors positions them as a reliable partner throughout the motor?s operational lifespan. Detailed records of all modifications and certifications are maintained, which simplifies regulatory inspections and enhances customer confidence in compliance management.

The established reputation of Dietz Electric as a trusted Orange1 Motors distributor allows customers to leverage a rare combination of authentic Italian motor innovation and American certification and support services. This fusion meets the growing demands of industries where operational efficiency, regulatory compliance, and safety are paramount. Henson remarks, "We are committed to delivering solutions that not only meet but exceed the expectations of our clients, providing peace of mind through quality, safety, and ongoing support."

Dietz Electric understands the critical role electric motors play in the functionality and safety of industrial operations. Their partnership with Orange1 amplifies their ability to deliver robust, efficient, and compliant

electrical drive systems tailored to diverse environmental and operational challenges. Industry players seeking dependable, customized motor solutions now have a clear advantage through Dietz Electric?s dedicated service offerings combined with Orange1?s engineering pedigree.

The transformation Dietz Electric brings through its role as an Orange1 Motors distributor signifies a pivotal shift in how motor engineering and aftermarket services converge to enhance industrial processes. By blending the best attributes of Italian innovation with American responsiveness and regulatory expertise, Dietz Electric continues to empower industries with electrifying solutions fit for the challenges of today and tomorrow.
