

## **Simply Pets Online Releases Eco-Friendly Slow Feed Cat Bowl**

*February 14, 2016*

February 14, 2016 - PRESSADVANTAGE -

Durham, DH - Simply Pets Online has released a new eco-friendly slow feed cat bowl for pet cats to prevent obesity. Keeping the weight of a pet cat under control can be a difficult issue overtime especially if the cat stays mostly indoors. However, this should be done to reduce the risk of health problems. The Amazon seller, Simply Pets Online, have recently launched a product called Slow Feed Cat Bowl that they claim assists with the problem of obesity.

According to an article from FamilyEducation.com there is a direct correlation between eating and excess weight. "Excess weight contributes to many serious health problems and shortens life, in cats as in people. Except in very rare cases, overweight is the result of overeating," stated the article entitled "Keeping Your Cat's Weight Under Control."

According to the article, "In an ideal world, your cat will stay at a proper weight throughout his life. Realistically, he might pack on some extra fat as time goes by. If your cat starts to get fat (or too thin), adjust

his food portions.? The slow feed cat bowl has a variety of different protrusions in the bowl that slows down the cat?s rate of eating and controls his food portions. This in turn causes less caloric intake and a reduction of weight of the cat. Simply Pets Online mentioned that it can be used for both dry or wet food.

The article from FamilyEducation.com further stated that, ?if your cat is fat, he needs to consume fewer calories. If you free feed, put your cat on a schedule so you can control his portions. If you already feed him on a schedule, reduce the amount you feed gradually over a week or so. Another way to reduce your cat's caloric intake is to switch to a lower-calorie food.?

The slow feed cat bowl from Simply Pets Online is designed to slow down feeding. According to the company, it allows cats to feel ?full on a smaller amount of food.? This augurs well in the attempt to control the weight of a cat. The cat will end up consuming less in a structured way over a good part of the day.

The slow feed cat bowl is manufactured from natural components that are safe for pets. The materials used to create the feeder bowls include bamboo fiber and rice husk. That means the feeding bowl is considered to be nontoxic and also is fully degradable and 100% recyclable. The eco friendly container is also made to be robust and is dishwasher safe.

The slow feed cat bowl can be purchased exclusively on the giant online portal, Amazon. Customers can purchase online in full confidence as the product is sold with a 100% money back guarantee.
