

Flower Mound RV & Boat Storage Announces New Website for New Boat and RV Storage Facility in Flower Mound, Texas

July 30, 2025

FLOWER MOUND, TX - July 30, 2025 -
Flower Mound RV & Boat Storage announced the launch of its new website, providing an accessible platform for residents and visitors of Flower Mound to learn more about their recently established boat and RV storage facility. The company, founded by local entrepreneur Jake Christmas, created the website to provide clear information about storage options, site features, and availability for those seeking secure and convenient storage for their recreational vehicles and boats in the rapidly growing North Texas region.

The new facility was developed to address a rising demand for boat and RV storage in Flower Mound and the surrounding area. As recreational vehicle and watercraft ownership increases across the Dallas-Fort Worth metroplex, many owners are finding it difficult to secure reliable, well-located storage options. Flower Mound RV & Boat Storage was established to meet this need by offering a dedicated space designed specifically for the protection and accessibility of large vehicles and vessels. The newly launched website reflects that mission by serving as a central hub for individuals seeking detailed information about the facility.

?Launching this website marks an important milestone for Flower Mound RV & Boat Storage,? said Jake Christmas, Owner. ?Our goal is to provide an easy way for customers to find the information they need, understand the storage options we have available, and learn why our facility is uniquely equipped to serve the needs of RV and boat owners in this community.?

The website offers users comprehensive information about the facility?s layout, security measures, and accessibility. It provides insights into the types of storage available for different sizes of recreational vehicles, boats, trailers, and any other vehicle with a VIN, ensuring customers can select a storage option that meets their specific requirements. The site was designed with a straightforward layout to make navigation easy and ensure that essential details are readily available.

The launch of this website coincides with an increasing focus on outdoor recreation in Texas. Boat and RV owners across the Dallas-Fort Worth area continue to seek out new ways to enjoy weekends, vacations, and extended travel. In Flower Mound, proximity to lakes, campgrounds, and major highways makes the area a strategic hub for recreational activities. Having a reliable storage facility nearby reduces the logistical challenges owners face when preparing for trips or maintaining their vehicles during the off-season.

Beyond convenience, the new RV and boat storage facility in Flower Mound emphasizes security and peace of mind for customers. According to Christmas, safety features and access controls were a top priority during development. ?RV and boat owners need to know their property is stored in a secure environment,? said Christmas. ?We have invested in measures that protect their vehicles and provide them with confidence every time they visit the facility.?

The website serves not only as an informational resource for potential customers but also as a reflection of the company?s commitment to transparency. By detailing the storage solutions available and providing clear communication channels for inquiries, Flower Mound RV & Boat Storage aims to make the process of finding and reserving a storage space as straightforward as possible. The company believes that this level of accessibility will help strengthen relationships with customers who value both security and ease of use when it comes to storing their recreational vehicles and boats.

The opening of the facility, conveniently located between Lake Lewisville and Lake Grapevine, arrives at a time when Flower Mound and the surrounding area continues to experience population growth and infrastructure development, creating additional demand for specialized services such as boat and RV storage. Local residents and visitors alike are looking for options that provide both convenience and quality, and Flower Mound RV & Boat Storage has positioned itself to meet those expectations.

As part of its long-term vision, the company intends to continue refining its services based on customer

feedback and evolving needs in the area. The new website is a central component of that strategy, offering a platform through which customers can engage with the business, request information, and stay informed about updates to the facility.

?Building this facility and launching the website are just the beginning,? Christmas said. ?We are committed to serving Flower Mound and surrounding communities with a storage solution that makes owning and enjoying an RV or boat simpler and more convenient.?

Residents of Flower Mound and the greater Dallas-Fort Worth area who are interested in learning more about the new boat and RV storage facility are encouraged to visit the website.
