

List Your Business For Better Ranking Service Introduced

February 12, 2016

February 12, 2016 -
LocalGuru has launched a new directory listing service. This enables people to list their local business, jobs and real estate on the directory, for free. Having a local business listing has been shown to help websites obtain a better ranking across all the search engines.

Clay Drake from LocalGuru says: "Get maximum online exposure today by submitting a listing for our directory. Submit your listing and benefit from the thousands of daily visitors our directory receives. A listing on our directory will help you reach out to more people and that means more interest in whatever you are promoting."

Local SEO is one of the most important elements of search engine optimization at present. It enables businesses to place themselves in front of customers that are actually physically looking for them. Directory listings are very effective tools in terms of achieving that. It is for that reason that LocalGuru has developed a number of packages for local businesses.

It is currently free to submit a listing with video ad view. However, they also offer a number of different

subscription packages for those businesses that want to get even more local traffic to their website to increase their overall online authority. All packages come with a full, 100% satisfaction guarantee and they are proving to be incredibly popular.

"I thought the days of directory listing were gone," says one happy customer. "However, I have been proven completely wrong. I get it now. Directory listings weren't popular anymore when the internet turned global. But now that the likes of Google want sites to focus on local SEO, they have made a huge comeback. Since listing with LocalGuru, I have seen my traffic expand exponentially, but the number of visitors that have come to my store on the high street has also gone up."

One of the most popular elements of the LocalGuru directory listing is the job board. This is because it benefits the community as a whole. For one, it enables people to find work and make better contributions to the local economy. Secondly, it is an opportunity for businesses to get their name out there, even for those who are not currently looking for work.
