

Go Industries Unveils Super Duty Winch Grille Guard System for Ford F550

August 07, 2025

Richardson, TX - August 07, 2025 -
Go Industries, a company known for making specialized truck and law enforcement accessories, has some exciting news. They have just introduced their newest product: the Commercial Grade Winch Grille Guard System. Established in Richardson, Texas, in 1978, Go Industries has been praised for making tough and smart products for the trucking and law enforcement industries. This new addition showcases their promise to deliver top-quality materials and craftsmanship.

Go Industries offers a comprehensive range of services and products, including truck accessories, law enforcement equipment, and custom manufacturing services, detailed on their company website. The newly announced Winch Grille Guard System exemplifies the strength and durability associated with their product line. Designed in a modular style, this grille guard sets the stage for easy assembly with a winch carrier and optional brush guards. Made from robust 5/16 inch laser-cut steel uprights and 2.5-inch 16-gauge steel cross tubes, it provides serious protection. It comes with custom heavy-duty mounting brackets to boost its resilience, making it fit for challenging terrains as well as daily driving.

This system's standout feature is its adaptability. Drivers can add optional brush guards to protect the vehicle's headlights from road debris and off-road challenges. The optional winch carriers support capacities of 9.5 or 16.5, suiting various customer needs. Plus, like all Go Industries products, this one comes with a three-year warranty covering materials, workmanship, and finish.

Go Industries takes great pride in making their products in the USA, sticking to high manufacturing standards. The modular design shows their innovative spirit, making products flexible and user-friendly. Their approach focuses on delivering protective yet customizable solutions, reinforcing their dedication to thoughtful design.

The CEO of Go Industries expressed, "Our new Winch Grille Guard System stands as proof of our dedication to both innovation and quality. We've designed it with our customers in mind, offering top-notch protection and flexibility for their vehicles."

The Ford F550 super duty winch grille guard illustrates the commitment to meet specific needs of widely used truck models. These guards can be tailored based on the vehicle's year, make, and model, ensuring they fit perfectly and perform excellently. Go Industries takes user feedback to heart, involving customers in the product development process to create better products.

Consideration for installers is also a key aspect of the product. By paying close attention to their needs, Go Industries ensures that the grille guard is simple to adjust and reliable in performance. This aligns with the company's aim to provide products that are efficient both in use and during installation.

Venturing beyond just truck accessories, Go Industries is also expanding into law enforcement and custom manufacturing. They offer a wide range of products, from grille guards to heavy-duty headache racks. Custom manufacturing services add to their portfolio, providing clients with unique solutions and quotes tailored to their specific requirements.

The Director of Product Development commented, "We are attentive to our customers' evolving needs, and our latest grille guard system reflects careful planning and customer input. It's engineered to handle tough conditions and offers versatility to suit different vehicle types."

The Commercial Grade Winch Grille Guard System is a shining example of Go Industries' tradition of developing excellent products. Adding this new offering to their lineup addresses the need for sturdy, customizable truck accessories. With a rich history and a promising road ahead, Go Industries promises to continue making products that consistently satisfy customer demands. For more detailed information about

their product range and services, visit their official website.
