ecoPest Rebrands to ecoPest Wildlife Management, Enhancing Wildlife Expertise

August 22, 2025

Reno, NV - August 22, 2025 -
ecoPest Management is excited to announce its official rebranding to ecoPest Wildlife Management along with a location change. This change is a strategic move to enhance the company's visibility and recognition in local areas it serves, including Reno, where its new address will be 1417 E 4th St, Reno, NV 89512. The new name and location better reflects their focus on managing wildlife and mitigating pest problems in an environmentally conscious way in the Reno area.

Tim Swain, CEO of ecoPest Wildlife Management, discussed the motivation behind the name change. He said, "While our name may have evolved to better capture our identity, our dedication to providing top-quality service to our clients remains as steadfast as ever. This change is primarily intended to ensure that our brand is unmistakably aligned with the scope of wildlife management services we deliver. We believe this will escalate our dedication to our customers." This change signals the company's emphasis on providing services that align with their mission to maintain ecological balance while effectively managing wildlife.

Although the company name has evolved to ecoPest Wildlife Management, the organizational structure and service quality remain constant. The ownership stays with the same committed team, who brings years of expertise in the industry. ecoPest Wildlife Management continues to offer an extensive range of services, including their signature ecoPest Wildlife Management Pest Control Service. This comprehensive service package includes wildlife removal, pest control, rodent removal, and various measures to prevent unwanted wildlife intrusion. More information about their specialized services such as Wildlife Removal and Pest Control can be found directly on their website.

Tim Swain further elaborates, "We are committed to our mission of maintaining ecological balance while addressing pest issues efficiently. Our name change signifies our focus and our promise to continue delivering high standards in wildlife management services." This commitment is evident in their wide-reaching services across Washoe County, Clark County, and Carson City, as well as extending into parts of California. Their reputation is bolstered by excellent customer feedback, showcasing their effectiveness in rodent removal and wildlife exclusion and prevention.

ecoPest Wildlife Management is especially skilled in addressing challenges related to wildlife. They carefully design their ecoPest Wildlife Management Wildlife Removal Service to manage and prevent issues with local wildlife species, such as bats, raccoons, and skunks using their expertise in wildlife removal. The company prides itself on using humane trapping methods and strategies that prioritize ecological balance, showing their dedication to responsible wildlife management practices..

Their continuous efforts are validated by the high ratings they receive on Google Reviews, reflecting customer satisfaction with their services. These reviews highlight the reliability and professionalism that the company consistently offers to its clientele.

As ecoPest Wildlife Management forges ahead with its new brand identity, they reassure clients and potential customers that despite the new name and location, the quality and dependability of their service remain unchanged. The rebranding effort not only aims to make the company more identifiable but also strengthens their mission to deliver humane and efficient wildlife solutions.

For more details about their service offerings or to arrange a consultation, ecoPest Wildlife Management invites individuals and businesses to reach out through their established contact channels. By taking this step, ecoPest Wildlife Management hopes to solidify its role as a trusted partner in wildlife and pest management, making their services easily accessible to communities in need. The company remains firmly committed to maintaining and improving their high standards in delivering effective wildlife management and pest control solutions.
