

Stanley SuperCoat and OneClickDIY Drive the Next Generation of DIY Spray Foam Insulation

August 25, 2025

Chantilly, Virginia - August 25, 2025 -
OneClickDIY, the exclusive authorized Stanley® reseller in the United States, announces expanded availability and customer support for DIY insulation and sealing solutions. The company offers a broad selection of spray foam kits, sealants, and adhesives for enthusiasts and professionals. Products are available at OneClickDIY.com and through leading marketplaces including Amazon and eBay.

At the center of the lineup is the Stanley SuperCoat F990P, a closed-cell, Class A fire-rated spray foam kit known for reliability and consistent field performance. It is suited to residential and commercial applications where thermal efficiency, draft control, and sound reduction are priorities. Customers report noticeable improvements in energy savings and overall insulation quality.

?Our goal is to empower individuals to take control of their projects,? said a OneClickDIY spokesperson. ?The SuperCoat F990P is a perfect example of how professional-grade insulation can be simple, effective, and accessible.?

Industry estimates place the global insulation market between $58.7 billion and $100.7 billion in 2024, with projected growth of roughly 4.4% to 7.7% CAGR through 2034. To meet this demand, OneClickDIY pairs the SuperCoat F990P with companion materials that support complete project scopes. The catalog spans foam sealants, construction adhesives, and caulks used across kitchens and baths, window and door assemblies, exterior siding transitions, light automotive care, and whole-home sealing.

Partnerships extend the range beyond Stanley®. OneClickDIY collaborates with manufacturers such as Kraken Bond, Sprayman, and Akfix to address specialty needs from gap-filling to high-temperature and silicone sealants, construction adhesives, and super glues. Kraken Bond FastCoat is positioned for moisture-prone areas, providing flexibility and durability where long-term adhesion matters.

Customer support and education are central to the offering. The OneClickDIY website features tutorials, step-by-step guides, and blog posts that explain product selection, surface preparation, and safe application. Support representatives assist with coverage calculations, substrate compatibility, and workflow planning so first-time DIYers and seasoned professionals can complete projects with confidence.

Sustainability is a continuing focus. Properly installed closed-cell foam can tighten the building envelope and support lower heating and cooling loads over time. The Stanley SuperCoat F990P includes clear coverage data?each 27.1-ounce kit covers up to 20 board feet?helping buyers right-size material use and control costs. The broader assortment also includes solutions such as mold release agents, fence post foam, and wall repair products that help extend the life of existing structures.

OneClickDIY is a U.S.-based distributor focused on professional-grade insulation and sealing materials for residential and light-commercial projects. The company emphasizes reliability, clear documentation, and accessible support. Stanley® is a registered trademark of its respective owner; use is for identification purposes only.
