

Dr. Jim Brantner, M.D. Plastic and Reconstructive Surgery Johnson City Introduces Advanced Non-Surgical Facelift Options

December 04, 2025

JOHNSON CITY, TN - December 04, 2025 -
Dr. Jim Brantner, M.D. Plastic and Reconstructive Surgery has expanded its comprehensive suite of facial rejuvenation treatments to address growing patient demand for minimally invasive cosmetic procedures. The Johnson City-based practice now offers advanced non-surgical facelift alternatives that deliver noticeable results without the extended recovery times associated with traditional surgical procedures.

The expansion comes as more patients seek effective facial rejuvenation options that fit their busy lifestyles while still providing meaningful aesthetic improvements. These advanced treatments combine multiple technologies, including radiofrequency, microneedling, and intense pulsed light therapy, to address common signs of aging such as skin laxity, wrinkles, and uneven skin tone.

"The landscape of cosmetic medicine has evolved significantly over the past decade, and patients today have access to remarkable technologies that can achieve impressive results without surgery," said Dr. Jim Brantner, board-certified plastic surgeon and founder of the practice. "Our non-surgical facelift treatments allow patients to address multiple concerns simultaneously while maintaining their daily routines with minimal

disruption."

The practice's non-surgical approach incorporates FDA-approved technologies, including Morpheus, which combines microneedling with radiofrequency to target both the skin surface and deeper dermal layers. Additional treatment options include Lumecca intense pulsed light therapy for addressing pigmentation and vascular issues, as well as ThermiTight and ThermiSmooth technologies that use controlled thermal energy to tighten skin and stimulate collagen production.

These advanced procedures complement the practice's existing portfolio of injectable treatments, including dermal fillers and neuromodulators, creating comprehensive treatment plans tailored to individual patient needs. The combination approach allows practitioners to address volume loss, skin texture, and muscle-related wrinkles in a coordinated treatment strategy.

Patients who learn more about Jim Brantner and his practice discover a medical professional with over 45 years of experience in cosmetic and reconstructive surgery. His extensive background includes residencies at Walter Reed Army Medical Center and Tripler Army Medical Center, along with board certification in Plastic Surgery from the American Board of Medical Specialties.

The practice serves patients throughout the Johnson City region, offering consultations to determine the most appropriate treatment approach based on individual goals and anatomical considerations. Treatment plans often combine multiple modalities to achieve optimal results while respecting each patient's comfort level with various procedures.

Jim Brantner Cosmetic & Reconstructive Surgery specializes in facial rejuvenation, breast procedures, body contouring, and non-surgical aesthetic treatments. The practice combines advanced medical technologies with personalized patient care to deliver comprehensive cosmetic and reconstructive surgery services to the Johnson City community.

Dr Jim Brantner and his team maintain affiliations with both Holston Valley Medical Center and Johnson City Medical Center, ensuring comprehensive medical support for all procedures. The practice has built its reputation on providing personalized care and achieving natural-looking results through both surgical and non-surgical approaches.
