

Keathley Landscaping Expands Cedar Fence and Yard Drainage Services

September 16, 2025

GARLAND, TX - September 16, 2025 -
Keathley Landscaping has expanded its cedar fencing installation and yard drainage services to better serve homeowners in Parker, Texas. The company, which has been providing landscaping solutions since 2002, now offers enhanced capabilities for both cedar fence installation and comprehensive drainage solutions to address the growing needs of residential properties in the area.

As a certified drainage contractor in Parker, Keathley Landscaping specializes in solving complex water management issues that can cause significant property damage. The expansion comes as homeowners increasingly seek professional solutions for both aesthetic improvements and practical drainage challenges that affect their properties during heavy rain events common to North Texas.

"Property owners often underestimate the importance of proper drainage until they face flooding or water damage," said Logan Keathley, NDS Certified Drainage Contractor and owner of Keathley Landscaping. "Our expanded services allow us to address these critical issues while also helping homeowners enhance their

outdoor spaces with quality cedar fencing that complements their drainage solutions."

The company's drainage services include French drain installation, yard grading, and custom-designed buried drainage pipe systems. Each drainage solution is tailored to the specific topography and challenges of individual properties, ensuring effective water management that protects homes from costly water damage that insurance typically does not cover.

As a specialized cedar fence company, Keathley Landscaping offers various fencing styles ranging from classic picket designs to modern horizontal configurations. Cedar remains a popular choice among Parker homeowners due to its natural resistance to decay and insects, rich warm tones, and minimal maintenance requirements. The company customizes each fencing project to match client preferences while ensuring proper installation that maximizes the fence's longevity.

The expanded services also address the growing demand for cedar fence replacement in the area. Many properties with aging fences require professional assessment to determine whether repair or full replacement provides the most long-term value. The company's comprehensive approach includes free consultations, custom design services, installation, and final inspections to ensure customer satisfaction.

Beyond drainage and fencing, Keathley Landscaping continues to offer additional services including stonework, retaining walls, outdoor living spaces, and flowerbed borders. The company's integrated approach allows homeowners to coordinate multiple landscape improvements, ensuring cohesive design and efficient project completion.

The expansion of services reflects the company's commitment to providing comprehensive outdoor solutions that address both functional needs and aesthetic goals. By combining expertise in drainage systems with quality fence installation, Keathley Landscaping helps homeowners protect their investments while creating attractive outdoor environments.

Keathley Landscaping has served the Dallas-Fort Worth metroplex for over two decades, establishing a reputation for reliable service and innovative solutions to challenging landscape problems. The company maintains certifications in drainage contracting and continues to adapt its services to meet evolving homeowner needs throughout Parker and surrounding communities.
