

Go Industries Inc. Unleashes Winch Grille Guards for Front-End Truck Protection

September 06, 2025

Richardson, TX - September 06, 2025 -
Go Industries Inc., a truck accessories and custom manufacturing company, is introducing a brand-new commercial-grade integrated winch grille guard system. This system is built for both strength and adaptability, catering to truck owners who need reliable front-end protection. Designed with practicality in mind, the grille guard system features a modular setup, which lets users add winch carriers and Brush Guards as needed.

"We're focused on delivering quality and versatility with our products," says the CEO of Go Industries. "The launch of our commercial-grade integrated winch system fits with our mission to provide truck owners with the ability to customize their vehicle's protection without skimping on strength or reliability."

The grille guard is made from solid 5/16 laser-cut steel uprights and 2.5-inch 16-gauge steel cross tubes. This robust construction means it can withstand road debris and obstacles in tough driving conditions. Owners can choose between 9.5 or 16.5 winch carriers, offering flexibility to meet different towing needs. Such customizable options allow worktruck winch owners to tailor their vehicle's protection based on the specific

challenges they might face on the road.

Installation is made easier with heavy-duty mounting brackets included with each grille guard. These ensure a strong and simple setup. For extra protection, the optional Brush Guards enhance the vehicle's lines while shielding headlights from debris or brush often encountered during off-road driving. Every product in this lineup carries a three-year warranty covering materials, craftsmanship, and finish quality.

Since 1978, Go Industries has provided truck accessories with the unique needs of truck owners in mind. The company's offerings include grille guards, heavy-duty headache racks, and bumper replacements, all showcasing their commitment to American-made quality. The winch grille guard system continues this tradition, giving vehicle owners confidence in their trucks' capability to handle demanding conditions.

In addition to their durable products, Go Industries embraces modern payment trends by accepting cryptocurrency. This move reflects their forward-thinking attitude, offering customers the convenience and security of today's payment methods. By providing digital currency options, Go Industries aims to expand access to its products, meeting the evolving landscapes of commerce.

A company spokesman added, "Items like the Go Industries Commercial Grade Winch System are crafted to tackle everyday challenges drivers face. We combine advanced manufacturing techniques with durable materials to provide accessories that not only meet but exceed industry standards."

Besides the winch grille guard system, Go Industries also offers various services to meet customer needs. Their lineup includes custom manufacturing options, allowing clients to request specific designs that suit their requirements.

Based in Richardson, Texas, Go Industries serves a wide range of customers in the truck accessories and custom manufacturing sectors.

For more details about the worktruck winch grille guard system and other products, customers are encouraged to visit Go Industries' website. The website also provides detailed information on specialized equipment for law enforcement vehicles and an option to get a quote for custom manufacturing services.
