Plumbing 360 Announces Expanded Service Coverage

September 19, 2025

TUCSON, AZ - September 19, 2025 -
Plumbing 360, a locally owned and operated plumbing company with over 25 years of experience, announces expanded service coverage throughout the greater Tucson metropolitan area to meet growing demand for professional plumbing services. The expansion comes as the company continues to build on its reputation for reliability and customer satisfaction, backed by more than 200 five-star reviews from residential and commercial clients.

The expanded service area now encompasses neighborhoods including Catalina Foothills, Rita Ranch, Vail, Tanque Verde, Sabino Canyon, Dove Mountain, Gladden Farms, Tucson Estates, Corona De Tucson, Three Points, and Drexel Heights. This broader coverage allows the company to serve more households and businesses throughout the region with comprehensive plumbing solutions.

The company offers a comprehensive range of services, including leak detection, clogged drain resolution, water heater installation and maintenance, water filtration system installation, repiping, gas line services, plumbing inspections, and bathroom remodeling. Licensed technicians handle both residential and commercial projects, with expertise in addressing common issues such as main water line leaks, irrigation system problems, and emergency plumbing situations.

"As a Plumber Tucson residents have trusted for decades, we recognized the need to extend our reach to serve more communities throughout the area," said a spokesperson for Plumbing 360. "Our expanded coverage means faster response times and greater accessibility for customers who need everything from emergency repairs to planned installations and renovations."

Recent customer feedback highlights the company's commitment to service excellence. One homeowner noted that technicians provided multiple reasonable solutions for a main water line issue that ran under their driveway and hardscape. Another customer praised the company's rapid response time, receiving emergency service within an hour for an irrigation system malfunction.

The expansion also strengthens the company's ability to serve commercial clients. The company has established partnerships with notable organizations such as the University of Arizona, Five Guys restaurants, and Bimbo Bakeries, demonstrating its capability to handle large-scale commercial plumbing needs alongside residential services.

A key differentiator for the company is its 100% satisfaction guarantee, which promises to redo any job that does not meet client expectations at no additional cost. This policy, combined with transparent pricing and fast response times, has contributed to the company's strong reputation in the community.

The company also offers BioOne, an environmentally friendly drain maintenance product that helps keep drains clear and odor-free. This solution represents part of the company's commitment to providing both traditional plumbing services and innovative maintenance options for customers.

Plumbing 360 maintains its headquarters in Tucson and employs licensed technicians trained in the latest plumbing technologies and techniques. The company's quarter-century of experience in the local market provides an understanding of regional plumbing challenges, from hard water issues to aging infrastructure in older neighborhoods.
