

Popular RI Physical Therapy Clinic Opens Second Office

February 25, 2016

February 25, 2016 - PRESSADVANTAGE -

Cranston, RI physical therapy clinic Muldowney Physical Therapy has opened a new clinic in North Smithfield, Rhode Island this month. They now operate across two addresses in order to better serve their clients. This came after a tremendous influx in clients after the publication of founder Kevin Muldowney's book on Ehlers-Danlos Syndrome, or EDS. More details are available at <http://www.muldowneypt.com/>.

According to Kevin Muldowney himself, "We have operated out of Cranston for quite a number of years, where we have built a significant base of patients. Since the release of my book, I have seen a tremendous influx of new patients, many of whom come from all over the country and some even from abroad. I felt it was necessary to open a second location in North Smithfield to be better able to serve all these new clients."

The clinics specializes in low back pain, neck pain, EDS, fibromyalgia, and orthopedic physical therapy. All therapists have advanced manual techniques qualifications. Compared to the average time physical therapists spend with patients in Rhode Island, patients at Muldowney spend as much as 30% to 50% longer with their therapists.

Those who have used the services of the clinic have been incredibly positive about their experiences. Many of them have shared this with Muldowney on Facebook, where information about the new book that Muldowney has released is also shared. "After approximately 6 months of left shoulder and neck pain, I went to physical therapy two times a week for several weeks," says one happy client. "I received hands-on treatment with a series of exercises to do at home. Each week showed progress and less pain. My range-of-motion greatly improved without difficulty and discomfort. I am very satisfied with my experience at Muldowney Physical Therapy. I was doubtful about traveling 30 minutes each way when there were other physical therapists so close to my home. I am very happy that I decided to travel the extra distance and would definitely recommend this group to my family and friends."

A Muldowney PT Video Review has also been released from a patient that highlights the benefits of the treatments that the clinic offers.
