

## **Go Industries Inc Expands Medium Duty Grille Guard Line for International CV515 and Other Commercial Trucks**

*September 22, 2025*

Richardson, TX - September 22, 2025 - PRESSADVANTAGE -

Go Industries Inc, a Richardson, Texas-based manufacturer of truck and fleet accessories, has expanded its medium duty grille guard product line to include enhanced compatibility for the International CV515, Chevrolet C4500-6500, and Ford F650-750 commercial trucks. The expansion addresses growing demand from fleet operators seeking durable front-end protection solutions that accommodate both standard operations and specialized winch applications.

The expanded product line features tilt-body grille guards specifically engineered for commercial medium-duty trucks. These units incorporate a forward-articulating design that maintains full hood access while providing comprehensive front-end protection. The grille guards feature dual OEM-style latches with safety pins on each side, ensuring secure mounting without requiring cutting or drilling during installation.

"Commercial fleet operators have been requesting brush guards cv515 models that can handle the

demanding conditions their trucks face daily while maintaining easy serviceability," said a Go Industries spokesperson. "This expansion represents our commitment to meeting those specific needs with American-made quality and engineering that fleet managers can depend on."

The medium duty grille guards are constructed using fully welded 1.9-inch, 14-gauge tubing for the headlight brush guards, combined with 2.5-inch center cross tubes for structural integrity. The center screen utilizes 18-gauge laser-cut material, providing both protection and visibility. Each unit includes an integrated winch tray capable of supporting winches up to 16,500 pounds, accommodating most major winch brands currently used in commercial applications.

Go Industries applies a black textured powder coat finish to all units, ensuring long-term durability and corrosion resistance in harsh operating environments. The grille guards are priced between \$1,772.75 and \$2,190.78, depending on configuration and vehicle specifications.

"Along with these grille guards and other new offerings in our catalog, we continue to focus on providing solutions that enhance both the functionality and longevity of commercial vehicles," added the Go Industries representative. "The ability to add winch capabilities while maintaining the tilt-body functionality sets these products apart in the medium-duty truck market."

The expansion comes as commercial trucking operations increasingly seek equipment that can serve multiple purposes while minimizing vehicle downtime. The no-drill installation process allows fleet maintenance teams to equip vehicles quickly without compromising chassis integrity, an important consideration for leased vehicles and warranty compliance.

Go Industries Inc has been manufacturing truck accessories, law enforcement equipment, and custom fleet solutions since 1978. The company maintains Platinum Status with SEMA and operates from its Texas facility where all products are designed and manufactured. In addition to grille guards, the company produces bumper replacements, headache racks, mud flaps, specialized law enforcement vehicle equipment, and custom manufacturing solutions for fleet operators. The company also operates Longhorn Reels, a division specializing in wire and cable handling solutions for industrial applications.
