Revolutionizing Welding Automation: Watch Gullco?s Hercules High Deposition Solution Live at FABTECH 2025

September 09, 2025

September 09, 2025 -
Gullco, a provider of innovative welding automation solutions, emphasizes its presence at FABTECH 2025 in Chicago. The company showcases its Hercules - High Deposition Welding Automation Solution, which sets a new standard for productivity and efficiency in heavy fabrication and structural welding. This event represents an opportunity for industry professionals to experience firsthand the latest advancements in welding technologies.

At this year?s conference, Gullco collaborates with Miller, Hobart, and Tregaskiss to present the Hercules system, designed for high-deposition, high-efficiency MIG welding. By integrating proven automation platforms with advanced power sources and high-efficiency filler metals, the Hercules system offers a comprehensive solution that enhances welding capabilities. FABTECH 2025 visitors to Booth B15009 can witness live demonstrations that highlight these innovations in action.

The Hercules system maximizes arc-on time while minimizing operator input. It boosts productivity by up to 30% compared to traditional welding methods. This turnkey solution from Gullco addresses the demanding

needs of heavy fabrication environments, making it an ideal choice for professionals in the industry. Gullco?s commitment to enhancing operational efficacy sets a benchmark for what welding automation can achieve.

?Welding automation solutions from Gullco significantly elevate productivity and precision, especially in high-demand applications,? said Jeff Zook, Director at Gullco. ?Our collaboration with industry leaders helps create systems that redefine what?s possible in welding technology.? This forward-thinking approach showcases Gullco's dedication to providing high-performance solutions tailored to modern manufacturing needs.

FABTECH represents North America?s largest event for metal forming, fabricating, welding, and finishing. It brings together industry leaders to explore new technologies and practical strategies to drive growth. This year?s event offers much more than traditional exhibits, serving as a hub for innovation and collaboration among welding professionals.

Visitors to FABTECH 2025 will find great value in the comprehensive nature of the conference, which has been connecting the manufacturing community for over 40 years. The event takes place at McCormick Place in Chicago, Illinois, and offers complimentary show floor admission for those who register early. This creates an accessible environment for companies to connect and engage with the latest advancements in their fields.

The Hercules system stands out for its ability to integrate seamlessly into existing workflows, transforming the way welding is approached in both fabrication shops and larger manufacturing plants. This solution provides companies with the tools they need to enhance efficiency while maintaining high standards of workmanship.

?Meaningful collaboration with our partners leads to the most effective solutions,? Zook adds. ?The result is equipment that not only meets but anticipates the evolving demands of the welding industry.? This forward-looking vision drives Gullco?s pursuit of excellence and innovation in welding automation.

Gullco invites attendees to visit their booth to interact with the team behind the Hercules system and learn about its features. Demonstrations will provide in-depth insights into the system's capabilities and the efficient welding processes it enables.

FABTECH 2025 runs from September 8 to September 11, with daily sessions designed to maximize attendee experience and knowledge. Professionals ready to advance their welding operations will find the information they need, along with tools and solutions from industry leaders.

As the conference approaches, anticipation builds for the impact that cutting-edge welding automation technology will have on the industry. The Hercules - High Deposition Welding Automation Solution exemplifies how innovation can drive productivity and operational efficiency in welding practices across

various sectors.

GullCo's four decades of welding automation expertise positions the company as a trusted partner for manufacturers facing increasingly complex fabrication demands. The company's focus on practical, field-tested solutions has earned recognition across industries where precision and efficiency determine profitability. At FABTECH 2025, attendees will see how this experience translates into technology that works reliably in demanding production environments.
