

Nortech Heating, Cooling & Refrigeration Marks Three Decades of HVAC Excellence

September 17, 2025

Seattle, Washington - September 17, 2025 - PRESSADVANTAGE -

Nortech Heating, Cooling & Refrigeration celebrates over 30 years of providing comprehensive HVAC and refrigeration services to residential and commercial customers throughout Seattle and the Puget Sound region. The milestone underscores the company's enduring commitment to delivering reliable heating, cooling, and refrigeration solutions while maintaining the highest standards of technical expertise and customer service.

Since its founding more than three decades ago, Nortech Heating has established itself as a trusted provider of essential climate control services across the Seattle metropolitan area. The company offers comprehensive HVAC solutions including furnace repair and replacement, heat pump installation, air conditioning service, ductless mini-split systems, and commercial refrigeration maintenance. Their service area extends throughout King County and beyond, encompassing Seattle, Tacoma, Bellevue, Kent, Lynnwood, Renton, Kirkland, Everett, Redmond, Auburn, Puyallup, Federal Way, Issaquah, Enumclaw, Bothell, and Burien.

"Reaching the 30-year mark in this industry reflects our dedication to solving complex HVAC challenges while adapting to evolving technology and customer needs," said Norman, founder of Nortech Heating. "Our longevity stems from maintaining factory-trained technicians, investing in ongoing education, and treating every service call with the urgency and professionalism our customers deserve."

The company maintains several professional certifications and affiliations that distinguish it in the competitive HVAC market. As a Mitsubishi Diamond Dealer, Nortech demonstrates expertise in advanced ductless technology and energy-efficient systems. The company holds accreditation with the Air Conditioning Contractors of America (ACCA) and maintains strong ratings with the Better Business Bureau and Angi's List. All technicians are NATE-certified, ensuring they meet nationally recognized standards for HVAC excellence.

Nortech's service portfolio addresses both routine maintenance and emergency situations. The company provides 24/7 emergency response for critical system failures, recognizing that heating and cooling emergencies can occur at any time. Their fleet of service vehicles carries extensive parts inventory, enabling technicians to complete most repairs during the initial service visit. This approach minimizes downtime for both residential customers and commercial operations that depend on reliable cooling and refrigeration systems.

Commercial clients particularly benefit from Nortech's specialized refrigeration expertise. The company services walk-in coolers, walk-in freezers, beverage coolers, ice makers, deli cases, and industrial chillers. These services prove essential for restaurants, grocery stores, medical facilities, and other businesses where temperature control directly impacts operations and regulatory compliance.

The Pacific Northwest's unique climate presents specific challenges that Nortech has mastered through decades of local experience. The region's wet winters, mild summers, and occasional temperature extremes require HVAC systems that can adapt to varying conditions while maintaining energy efficiency. The company's technicians understand these regional considerations and recommend solutions tailored to Seattle's specific weather patterns and building requirements.

Nortech Heating, Cooling & Refrigeration operates as a fully licensed, bonded, and insured HVAC/R contractor in Washington State. The company services all major equipment brands and maintains partnerships with leading manufacturers to ensure access to quality replacement parts and the latest technology advances in climate control systems.
