Oakland, California - September 10, 2025 -

Burneikis Law, P.C. is proud to announce that founding attorney Monica Burneikis has been selected for inclusion in the 2025 edition of The Best Lawyers in America® in Northern California. Recognized specifically for her work in Personal Injury Litigation ? Plaintiffs, this distinction marks a significant professional achievement and reflects Burneikis?s ongoing commitment to delivering exceptional legal representation to individuals and families impacted by serious injuries.

Selection to The Best Lawyers in America® is one of the most respected honors in the legal industry. Unlike rankings driven by marketing or client nominations, this recognition is entirely based on peer review. Attorneys are evaluated by colleagues within their geographical region and practice area, with a focus on professional ability, integrity, and reputation. For the 2025 edition, Best Lawyers analyzed over 23 million evaluations from attorneys nationwide to identify leaders across 150 practice areas. Nearly 80,000 lawyers were ultimately recognized ? and among them, only a select group in Northern California earned placement

in the competitive field of personal injury litigation for plaintiffs.

?Serving injured clients and their families is deeply personal work,? said Burneikis. ?Each case represents a person whose life has been turned upside down ? through no fault of their own. I?m honored by this recognition from fellow attorneys, and I share this with my team and every client who has placed their trust in us. We?re proud to fight on their behalf.?

Based in Oakland, Burneikis Law, P.C. is known for its work on complex and high-stakes personal injury cases, including catastrophic roadway collisions, truck and commercial vehicle accidents, and wrongful death matters. Burneikis herself is a seasoned litigator who has secured favorable results for clients across Northern California, often taking on cases involving life-changing injuries such as traumatic brain injuries, spinal cord trauma, and orthopedic damage.
