

Spray Foam Insulation Services Expanded to Meet Growing Demand

October 14, 2025

GIDDINGS, TX - October 14, 2025 -
H & R Spray Foam Insulation, owned and operated by Edith Mireles, announced today the expansion of its professional spray foam services to the Leander, Texas area. The move comes in response to growing demand from homeowners and business owners seeking more effective and energy-efficient insulation solutions. With the fall season underway, many property owners are taking advantage of the mild weather to complete insulation upgrades before the cooler months arrive.

Spray foam insulation has become one of the most trusted solutions for improving energy efficiency, lowering utility costs, and maintaining indoor comfort year-round. According to the U.S. Department of Energy, nearly half of a household?s energy use comes from heating and cooling. Proper insulation can help reduce these energy costs by as much as 20%, making it a practical investment that pays for itself over time.

Unlike traditional materials such as fiberglass or cellulose, spray foam insulation expands after application, forming a seamless and airtight barrier that minimizes air leaks, drafts, and moisture intrusion. This not only

keeps homes warmer in the winter and cooler in the summer but also supports better indoor air quality by reducing the infiltration of dust, allergens, and outdoor pollutants.

For Leander homeowners and businesses, this expansion arrives at an ideal time. Fall?s moderate temperatures provide the perfect window to complete insulation projects efficiently and with minimal disruption. By addressing insulation needs before winter, property owners can immediately benefit from improved temperature control and reduced heating expenses.

H & R Spray Foam Insulation now offers a comprehensive range of services tailored to different property types, including residential homes, commercial buildings, and industrial facilities. The company?s technicians apply spray foam to walls, attics, crawl spaces, and other hard-to-reach areas, ensuring complete coverage and long-lasting results. Because spray foam adheres directly to surfaces and expands to fill gaps, it is suitable for both new construction and retrofit projects, giving property owners flexibility in how and when they choose to upgrade.

?Expanding to Leander allows us to help more property owners prepare for the months ahead with insulation solutions that last,? said Edith Mireles, owner of H & R Spray Foam Insulation. ?Fall is the best time to address insulation needs because projects can be completed quickly, and customers start noticing energy savings right away once temperatures drop.?

In addition to improving energy efficiency and comfort, spray foam insulation contributes to the long-term value of a property. The material does not settle or degrade over time, maintaining its performance and reducing the need for future replacements. This durability means fewer maintenance concerns and consistent energy savings over the years.

For homeowners, improved insulation can also enhance resale appeal. Buyers are increasingly aware of energy efficiency ratings, and well-insulated homes tend to attract stronger interest and higher offers. For business owners, improved insulation translates to lower operating costs and more consistent indoor conditions, creating a more productive work environment.

H & R Spray Foam Insulation in Leander, TX is committed to helping local property owners enhance building performance through proven, modern insulation methods. The company emphasizes a customer-focused approach, ensuring that each project is completed with attention to detail, quality materials, and expert application.

As energy costs continue to rise, timely insulation upgrades remain one of the most effective ways to protect a property from waste and discomfort. The company?s expansion into Leander ensures that more Texas residents can now access reliable, high-quality insulation services designed to improve comfort, efficiency,

and indoor air quality year after year.

For property owners considering an insulation project, H & R Spray Foam Insulation encourages scheduling a consultation to discuss specific needs, evaluate existing insulation, and plan for an efficient installation before winter.
