

West Coast Tire & Services Expands Auto Repair Services for All Makes & Models Across South Orange County

April 22, 2026

San Juan Capistrano, CA - April 22, 2026 -
West Coast Tire & Services, a certified GoodYear Auto Service Center in San Juan Capistrano, has expanded its comprehensive automotive repair and maintenance services to better serve customers throughout South Orange County, including the recent addition of San Clemente to its service area.

The expansion comes as the company continues to address growing demand for affordable alternatives to dealership service departments. With ASE-certified technicians and state-of-the-art diagnostic equipment, the facility provides factory-scheduled maintenance and repairs for both foreign and domestic vehicles at competitive prices compared to traditional dealership rates.

"Our expansion into San Clemente reflects our commitment to making professional automotive services more accessible throughout South Orange County," said Todd, service manager at West Coast Tire & Services. "We understand that vehicle owners are looking for reliable service centers that combine

dealership-level expertise with more competitive pricing, and that's exactly what we deliver."

The company's service offerings encompass a wide range of automotive needs, from routine maintenance to complex repairs. As a certified Good Year San Juan Capistrano service center, the facility maintains factory standards while offering the personalized attention of a local business. Services include engine rebuilding, suspension repair, diesel maintenance, brake repair, cooling system services, and comprehensive tire services.

The expansion builds on the company's established presence in Dana Point, San Juan Capistrano, and Laguna Niguel. Since 2006, the facility has developed a reputation for combining technical expertise with transparent pricing practices. The service center utilizes dealer-level diagnostic equipment to accurately identify and address vehicle issues across all major automotive systems.

Beyond standard repair services, the company offers specialized diesel repair and maintenance, including lift kit installations and wheel services for diesel vehicles. The facility's technicians maintain current ASE certifications and receive ongoing training to stay current with evolving automotive technologies and repair techniques.

"Vehicle maintenance and repair costs continue to be a significant concern for drivers throughout the region," added Todd. "By expanding our service area and maintaining our focus on competitive pricing, we're helping more customers keep their vehicles running reliably without the premium costs typically associated with dealership service departments."

The company also provides flexible payment options, including financing programs and compatibility with extended warranty providers, making essential vehicle repairs and maintenance more accessible to customers facing unexpected automotive expenses.

West Coast Tire & Services operates as a full-service automotive repair facility specializing in all makes and models of vehicles. The company combines the resources and standards of a certified GoodYear Auto Service Center with the personalized service approach of an independent repair shop. Since its establishment in 2006, the facility has served South Orange County with comprehensive automotive repair, maintenance, and tire services, maintaining a focus on technical excellence and competitive pricing.
