Williams and Sons Custom Construction Expands Home Renovation and Addition Services

September 25, 2025

CASSVILLE, MO - September 25, 2025 -
Williams and Sons Custom Construction and Design, a family-owned custom home builder serving Southwest Missouri for over 50 years, has expanded its service offerings to include comprehensive home additions and renovation solutions for existing homeowners throughout the region. The expansion addresses growing demand from residents in Monett, Golden, Eagle Rock, Shell Knob, and Cassville who seek to modify their current homes rather than relocate.

The company, previously focused primarily on new custom home construction, now provides full-scale renovation and addition services designed to help homeowners adapt their existing spaces to changing lifestyle needs. This service expansion includes kitchen and bathroom remodels, room additions, second-story expansions, and complete home renovations while maintaining the same attention to detail and craftsmanship that has defined their custom home building projects.

"We recognized that many families in Southwest Missouri have deep roots in their communities and want to

stay in their current homes while updating them to meet modern needs," said Trevor, project manager at Williams and Sons Custom Construction. "This expansion allows us to serve those clients who need more space or updated layouts but prefer renovation over relocation. Our team brings the same hands-on approach and commitment to timeline management that we apply to every custom home project."

As a Williams and Sons Custom Construction Custom Home Builder, the company maintains its core focus on personalized service and quality craftsmanship. The expansion leverages their existing in-house design capabilities to provide clients with detailed renovation plans and architectural modifications that seamlessly integrate with existing structures. Each project begins with a comprehensive consultation to understand the client's vision, followed by detailed planning and transparent communication throughout the construction process.

The company's approach to renovations mirrors their established custom home building methodology, with owners present on-site to oversee projects and ensure quality standards are met. Williams and Sons Custom Construction Architectural Design services now encompass both new construction blueprints and renovation plans, allowing clients to visualize proposed changes before construction begins. This integrated design-build approach streamlines the renovation process and helps prevent common communication issues that can arise when design and construction services are handled by separate entities.

Williams and Sons Custom Construction and Design has built its reputation on maintaining clean job sites, meeting project timelines, and providing clear communication throughout the building process. These same principles now extend to their renovation and addition services, with dedicated project management ensuring minimal disruption to homeowners during construction. The company offers free consultations for all renovation and addition projects, helping homeowners understand the scope, timeline, and investment required for their specific needs.

With over five decades of experience in the Southwest Missouri construction industry, Williams and Sons Custom Construction and Design combines traditional craftsmanship with modern building techniques. The company's expansion into comprehensive renovation services reflects their commitment to serving the evolving needs of Southwest Missouri communities while maintaining the personalized, family-owned approach that has distinguished their business since inception.
