Piedmont Paint & Finish Expands Shop Painting Services With Custom Spray Booth

September 12, 2025

Charlottesville, VA - September 12, 2025 -
Piedmont Paint & Finish, a Charlottesville-based painting company, has expanded its professional shop painting capabilities to address increasing demand for eco-friendly cabinet and furniture refinishing services throughout Central Virginia. The company's 2,500-square-foot workshop features the region's only professional-grade custom spray booth, enabling precise application of low-impact finishes that extend the life of existing cabinetry and furniture while reducing environmental waste.

The expansion comes as homeowners throughout the Charlottesville area increasingly seek alternatives to full cabinet replacement, driven by both sustainability concerns and rising material costs. The Piedmont Paint & Finish custom paint shop specializes in transforming existing kitchen and bathroom cabinets, furniture pieces, and decorative elements through advanced refinishing techniques that deliver durability comparable to new installations.

"We're seeing unprecedented interest from property owners who want to preserve the character of their homes while updating their aesthetics," said Charles Davis, a spokesperson for Piedmont Paint & Finish. "Our spray booth technology allows us to apply sophisticated water-based lacquer finishes that are both environmentally responsible and exceptionally durable, giving cabinets and furniture a completely refreshed appearance without the waste associated with replacement."

The facility's professional spray booth enables controlled application of specialty finishes, including antique effects, custom color matching, and protective clear coats in various sheens. This technology ensures consistent results while minimizing overspray and reducing volatile organic compound emissions compared to traditional refinishing methods.

The shop painting service addresses a critical need in the historic Charlottesville region, where many properties feature original architectural elements and custom millwork that owners prefer to preserve rather

than replace. The refinishing process typically requires less time than full replacement projects, allowing homeowners to minimize disruption while achieving significant visual improvements.

Beyond residential applications, the Piedmont Paint & Finish paint shop in Charlottesville serves commercial clients seeking to update office furniture, retail fixtures, and hospitality furnishings. The company's workshop includes a dedicated preparation room where surfaces are properly treated before finishing, and an artistic finishes studio where specialized techniques are applied to achieve custom effects.

Recent projects have included transforming dated oak cabinets into modern painted finishes, restoring antique furniture pieces with period-appropriate stains and protective coatings, and creating custom color schemes that complement existing architectural features. The company's technicians work with both residential and commercial clients throughout Barboursville, Crozet, Gordonsville, Keswick, and surrounding communities.

Piedmont Paint & Finish maintains membership in the Painting Contractors Association and operates both a refinishing workshop and a retail paint store, Pigment Paint Supply, where customers can purchase specialty paints and supplies. The company offers comprehensive painting services, including residential and commercial painting, power washing, and custom shop finishing, positioning itself as a complete resource for property improvement projects throughout Central Virginia.
