

Reedy Branch Equipment and Rock Solid Cargo Strengthen Longstanding Alliance

October 01, 2025

Pearson, GA - October 01, 2025 -
Reedy Branch Equipment announced a continued partnership with Rock Solid Cargo Trailers, known for tough and dependable enclosed trailers. Reedy Branch Equipment was one of the first dealers to partner with Rock Solid Cargo and plans to continue its long and trusted alliance with the company.

The Pearson, Georgia-based equipment dealer, which began carrying Rock Solid Cargo trailers when the manufacturer started production in 2017, has increased its inventory to include specialized enclosed trailers designed for events, construction sites, and recreational travel applications. The expanded product line represents a response to customer requests for mobile facilities that combine durability with practical functionality. Customers can view the current Rock Solid Cargo inventory at https://www.reedybranchequipment.com/rock-solid-cargo-trailers/.

"We've worked with Rock Solid Cargo since the early days, and it's been a solid partnership from the start. Their enclosed trailers are built to last, and now we're especially excited to feature their new line of bathroom

trailers," said Pat Brown, a representative for Reedy Branch Equipment.

The bathroom trailers join an existing inventory that includes enclosed cargo trailers, equipment trailers, open car haulers, dump trailers, utility trailers, and tilt trailers. Rock Solid Cargo manufactures all trailers in Douglas, Georgia, incorporating features such as ThermaCool ceiling liners, 4D-Rings standard on most models, Z-Tech undercoatings, LED lighting throughout, and radial tires. The manufacturer provides a 5-year warranty on all trailer models.

Reedy Branch Equipment maintains both in-stock inventory and special order capabilities. The dealer also offers custom trailer design services, allowing customers to specify exact dimensions and features based on their hauling requirements. Financing options are available through multiple lending partners, and the company arranges nationwide delivery through third-party logistics providers.

Additional information about the partnership and available models can be found through https://www.google.com/search?q=Reedy+Branch+Equipment+Rock+Solid+Cargo.

The inventory expansion aligns with increased demand for specialized hauling solutions in the commercial and recreational markets. Construction companies, event planners, and recreational users have shown particular interest in the bathroom trailer models, which provide self-contained facilities for remote locations.

The company offers factory-direct pricing on all trailer models and provides consultation services for customers seeking specific hauling solutions. Custom trailer orders typically require detailed specifications regarding size, weight capacity, and intended use to ensure proper configuration.

Reedy Branch Equipment operates from 522 Georgia Pacific Lane in Pearson, Georgia. The company was among the first dealers to partner with Rock Solid Cargo when the manufacturer began operations seven years ago. Since then, the dealer has expanded its service area throughout the Southeast while maintaining its focus on providing various trailer types for commercial and personal use. The company recently updated its website platform, as detailed at https://pressadvantage.com/story/82452-reedy-branch-equipment-co-llc-unveils-revamped-website, to provide improved navigation and product specifications.
