

Evans Property Inc Expands Dumpster Rental Services

October 02, 2025

HEPHZIBAH, GA - October 02, 2025 -
Evans Property Inc, a family-owned waste management company serving the Central Savannah River Area since 2007, announces expanded service availability and streamlined booking options for residential and commercial cleanup projects throughout the Augusta metropolitan region.

The Hephzibah-based company now provides comprehensive waste management solutions across an extended service territory including Augusta, Evans, Grovetown, Thomson, Waynesboro, Martinez, Blythe, and Wrens in Georgia, as well as Aiken and North Augusta in South Carolina. The expansion addresses growing demand for reliable dumpster rental and junk removal services in both residential neighborhoods and commercial districts.

Evans Property Inc - Dumpster Rentals offers five container sizes ranging from 12 to 25 cubic yards, with all rentals including a seven-day rental period. The company maintains starting prices from $275 for a 12-yard container to $425 for the largest 25-yard option, providing transparent pricing for customers planning renovation projects, estate cleanouts, or construction debris removal.

"Our commitment to the Augusta metro area goes beyond just dropping off dumpsters," said Robert Evans, spokesperson from Evans Property Inc. "We understand that every cleanup project has unique requirements, whether it's a homeowner tackling a garage cleanout or a contractor managing a commercial renovation. Our expanded service coverage ensures more residents and businesses can access reliable waste management solutions when they need them."

The company has enhanced its digital presence to better serve customers seeking immediate assistance. Through their website and social media channels, including the Evans Properties Inc Facebook Page, customers can access pricing guides, service area information, and direct booking capabilities. This digital infrastructure supports the company's 24/7 service availability model, allowing customers to schedule services at their convenience.

Evans Property Inc - Junk Removal Services complements the dumpster rental offerings by providing full-service removal for customers who prefer professional handling of their unwanted items. This service particularly benefits elderly residents, busy professionals, and property managers who require efficient removal without the physical demands of self-loading a dumpster.

The company's growth reflects broader trends in the waste management industry, where locally-owned operators increasingly compete with national chains by offering personalized service and community-focused solutions. Evans Property Inc maintains its competitive edge through flexible rental periods, diverse container sizes, and comprehensive coverage across both Georgia and South Carolina markets.

"We've built our reputation on being responsive to local needs," added Evans. "Whether someone needs a small dumpster for a weekend project or requires multiple containers for a large-scale demolition, we provide the same level of professional service and reliability."
