OCD Fab & Performance Highlights Advanced Truck Bedliner Solutions Using Scorpion Coatings Technology

September 18, 2025

September 18, 2025 -
OCD Fab & Performance, a veteran-owned automotive customization shop in Bend, Oregon, is highlighting its specialized truck bedliner services that utilize Scorpion Coatings and state-of-the-art Graco Reactor 2 H-XP2 equipment to deliver durable protection solutions for truck owners throughout Central Oregon.

The company's bedliner services address growing demand from truck owners seeking reliable protection against impact damage, rust, and corrosion while maintaining their vehicles' appearance and functionality. Using advanced polyurethane formulations, the shop provides customizable solutions that can withstand heavy-duty use and extreme weather conditions common in the Pacific Northwest.

"Truck bedliners have evolved significantly in recent years, and we're committed to offering the most advanced protection available," said Ethan, owner of OCD Fab & Performance. "Our Scorpion Coatings system allows us to provide customizable textures and finishes that can even match factory paint colors, giving truck owners both protection and aesthetic options they couldn't get with traditional bedliner applications."

The company's bedliner solutions feature UV-stable formulations that prevent fading and maintain appearance over extended periods, addressing a common concern among truck owners in high-altitude environments with intense sun exposure. The low VOC and environmentally friendly properties of Scorpion Coatings products align with increasing environmental consciousness in the automotive aftermarket industry.

OCD Fab & Performance truck bedliners represent part of the company's comprehensive approach to vehicle customization and protection. The shop's investment in professional-grade equipment, including the

Graco Reactor 2 H-XP3 system, enables precise application and consistent results across different truck models and bed configurations.

The emphasis on quality and customer satisfaction has earned the business recognition in the local community, with the company maintaining a perfect 5-star rating based on customer reviews. Clients have specifically praised the professionalism of the staff and the range of services offered, with truck bed liners frequently mentioned.

Beyond bedliner applications, the family-run business offers a full spectrum of automotive services including wheels and tires, detailing, bumpers, lighting, suspension, performance upgrades, custom fabrication, and marine decking.

The shop operates from its facility at 20798 NE High Desert Lane in Bend, serving customers throughout Central Oregon. Operating hours run Tuesday through Saturday from 8 AM to 5 PM, with the business closed on Sundays and Mondays to allow staff time for continued training and equipment maintenance.

OCD Fab & Performance continues to expand its capabilities in automotive customization while maintaining its focus on quality craftsmanship and customer service. The company's veteran ownership brings discipline and attention to detail to every project, from basic maintenance to complex custom fabrication work.
