

Benjamin Franklin Plumbing Company Holly Springs Expands Services with Advanced Sewer Line Inspections and Tailored Hard Water Treatments

September 19, 2025

September 19, 2025 -

Benjamin Franklin Plumbing Holly Spring has expanded its specialized plumbing services to include advanced sewer line inspection technology and customized hard water treatment solutions designed specifically for the community's unique water conditions. The expansion addresses growing demand from homeowners seeking proactive maintenance solutions and improved water quality throughout their properties.

The plumbing company in Holly Springs has invested in state-of-the-art video inspection equipment that allows technicians to conduct thorough sewer line assessments without excavation. This technology enables the identification of potential issues such as root intrusion, pipe deterioration, and blockages before they develop into costly emergencies. The expansion also introduces comprehensive hard water treatment systems tailored to address the specific mineral content found in local water supplies.

"The expansion of these specialized services reflects our commitment to providing Holly Springs residents with preventive solutions that protect their homes and improve their quality of life," said a spokesperson for Benjamin Franklin Plumbing. "By combining advanced diagnostic technology with eco-friendly water treatment options, we're helping homeowners avoid expensive repairs while ensuring their plumbing systems operate efficiently for years to come."

The new sewer line inspection service utilizes high-resolution camera technology to provide detailed visual assessments of underground pipes. This non-invasive approach eliminates the need for exploratory digging and allows plumbers in Holly Springs to pinpoint exact locations of concerns. The service includes comprehensive reporting with video documentation, enabling homeowners to make informed decisions about necessary repairs or maintenance.

Hard water affects numerous households in the area, leading to mineral buildup in pipes, reduced appliance efficiency, and potential damage to plumbing fixtures. The customized water treatment solutions now offered address these challenges through systems specifically calibrated for local water conditions. These eco-friendly treatments not only protect plumbing infrastructure but also improve water taste and reduce soap and detergent usage.

Benjamin Franklin Plumbing has integrated these new services into its comprehensive plumbing portfolio, which includes emergency services, leak detection, drain cleaning, and water heater installation. The company maintains its commitment to punctuality through its unique policy of compensating customers $5.00 per minute for late arrivals, up to $300.

The expansion comes as Holly Springs continues to experience residential growth, with many homeowners seeking reliable plumbing partners for both preventive maintenance and emergency needs. The company's technicians undergo continuous training on the latest technologies and eco-friendly practices to ensure service excellence.

Benjamin Franklin Plumbing, recognized by Forbes as one of the Best Plumbing Companies of 2024, serves Holly Springs and surrounding communities with comprehensive residential and commercial plumbing solutions. The locally owned company offers 24/7 emergency services, a club membership program with exclusive benefits, and a two-year guarantee on workmanship. Known for combining technical expertise with exceptional customer service, the company has established itself as a trusted resource for plumbing needs ranging from routine maintenance to complex installations.
