

White Oak Landscape Marks 46 Years as Atlanta Landscape Company

October 07, 2025

MARIETTA, GA - October 07, 2025 -
White Oak Landscape Company, Inc. marks 46 years of providing landscape maintenance services to the greater Atlanta metropolitan area, highlighting its evolution from a local Marietta startup in 1977 to a comprehensive landscape service provider for residential and commercial properties throughout north Georgia.

The milestone comes as the company prepares for winter landscape maintenance demands, a critical period when property owners address dormant season pruning, irrigation system winterization, and planning for the following year's landscape improvements. The company's longevity in the Atlanta market reflects changes in landscape management practices over nearly five decades.

"Reaching 46 years in business represents thousands of properties maintained and countless seasonal cycles managed," said Rocky DeVotie, President and CEO of White Oak Landscape. "The landscape industry has transformed significantly since 1977, with advances in irrigation technology, plant science, and

sustainable practices. Our experience through these changes positions us to address both traditional landscape needs and modern environmental considerations."

The company has stayed relevant by sharing seasonal landscape information and maintenance tips through its Facebook page at https://www.facebook.com/WhiteOakLandscape. White Oak Landscape's service portfolio has also expanded from basic lawn maintenance in its early years to include irrigation system design and management, plant health diagnostics, seasonal color programs, and comprehensive property management services. The company employs certified technicians trained in current horticultural practices and landscape management techniques.

The Atlanta landscape industry has experienced substantial growth over the past four decades, with the metropolitan area adding over 3 million residents since 1977. This expansion has created increased demand for professional landscape services as both residential neighborhoods and commercial developments require ongoing maintenance and management.

Winter preparation represents a significant portion of annual landscape maintenance requirements in north Georgia, where temperature fluctuations and occasional freezing conditions require specific attention to irrigation systems, plant protection, and dormant pruning schedules. White Oak Landscape addresses these seasonal requirements through systematic maintenance programs tailored to individual property needs. Additional information about landscape services and seasonal maintenance schedules can be found at https://whiteoaklandscape.com.

"Winter maintenance often determines landscape success in the following growing season," added DeVotie. "Proper dormant pruning, mulching, and irrigation system maintenance performed now establishes the foundation for healthy spring growth. Our 46 years of experience with Georgia's climate patterns inform these critical timing decisions."

White Oak Landscape Company, Inc. has operated in the Atlanta metropolitan area since 1977, providing landscape maintenance services for residential and commercial properties. Based in Marietta, Georgia, the company offers maintenance programs, irrigation management, plant health services, and seasonal landscape management. The company employs certified landscape technicians and maintains equipment and expertise for properties throughout north Georgia. Find supplementary resources available at https://qrco.de/bf9sTq.
