

Orange County Restoration Services Expands to Newport Beach

September 19, 2025

September 19, 2025 -
Orange County Restoration Services, Inc., a damage restoration company with over 38 years of experience, has announced the expansion of its comprehensive restoration services to Newport Beach and surrounding coastal communities. The expansion addresses the unique water damage challenges faced by coastal properties, including salt air corrosion, king tides, and seasonal storm damage.

The IICRC-certified restoration company brings its full range of emergency response capabilities to Newport Beach residents and businesses, offering 24/7 availability with an average response time of 60 minutes. The expansion includes water damage restoration, fire damage restoration, mold remediation, sewage cleanup, and specialized services for coastal properties.

"Newport Beach properties face distinct restoration challenges due to their proximity to the ocean and exposure to coastal weather patterns," said Jeff Murray, Operations Director at Orange County Restoration Services. "Our expansion into this area allows us to provide specialized expertise in addressing salt air

corrosion, humidity-related damage, and the unique infrastructure needs of coastal homes, many of which feature older construction that requires careful attention during restoration."

The company's Water Damage Restoration services in Newport Beach address common coastal issues, including pipe bursts from salt corrosion, roof leaks from winter storms, flooding from king tides, and water damage resulting from appliance failures. The restoration process follows industry-standard protocols as well as emergency assessment, water extraction, structural drying using Applied Structural Drying certification methods, continuous monitoring and documentation, and comprehensive final inspection.

Newport Beach's coastal climate presents particular challenges for property owners. High humidity levels can accelerate mold growth following water damage incidents, while salt air can corrode plumbing systems and building materials more rapidly than in inland areas. King tides and winter storms pose additional flooding risks that require immediate professional response to prevent long-term structural damage.

The company distinguishes itself by working directly for property owners rather than as a preferred vendor for insurance companies, ensuring that client interests remain the primary focus throughout the restoration process. This independent approach allows for more thorough restoration work and better advocacy for property owners during insurance claims.

Orange County Restoration maintains certifications in water damage restoration, mold remediation, and fire damage restoration through the Institute of Inspection, Cleaning and Restoration Certification. The company's technicians undergo continuous training in the latest restoration techniques and equipment operation, ensuring compliance with industry standards and regulations.

Additional services available to Newport Beach residents include asbestos removal, contents cleaning, crawl space and attic cleanup, mold inspection and testing, and complete rebuild solutions. The company also offers flexible financing options and provides discounts for military personnel and first responders.

Orange County Restoration Services is a locally owned and operated restoration company based in Irvine, California. The company provides residential and commercial restoration services throughout Orange County, specializing in emergency response for water, fire, and mold damage incidents. With Applied Structural Drying certification and comprehensive insurance coverage, the company has maintained a 4.9 out of 5-star rating from clients across its service areas.

"reviewBody": "I can not say enough about my experience with OC Restoration Services. I don't do reviews because businesses should provide decent services. However, when a business excels, then they deserve praise. Everyone that I dealt with was very professional. First of all, I must highlight the fact that working with Isaiah was on every level the absolute best experience. Having to deal with unexpected mold is stressful, however, Isaiah made the process easy to deal with. He was a great communicator that was always available. The few times when he was not available he always got back to us right away. He keep us up to date on the remediation at every step. Since we are out of town, he took pictures and was right there to trouble shoot some unforeseen issues and gave us peace of mind that all was being taken care of and done the right way. Isaiah seems to take pride in customer service, doing quality work and being the utmost professional in his field."
