Midwest Dry Eye Center Adds Eye and Skin Treatments at Northfield & Long Grove Illinois Location

September 29, 2025

LONG GROVE, IL - September 29, 2025 -
NORTHFIELD & LONG GROVE, IL? Midwest Dry Eye Center has expanded its services with the launch of a new full-service aesthetics suite for eye and skin treatments at its Northfield and Long Grove locations. Developed in collaboration with Forsight Vision Care, this expansion gives patients access to medical-grade skincare and therapeutic dry eye treatments in a single appointment.

?Patients often come in asking why their eyes feel tired or look puffy, even when their vision is fine,? said Dr. Cohan, O.D. ?It?s because eye health doesn?t stop at the eyeball. The skin and glands around the eyes play a major role in how comfortable and confident someone feels. With this new offering, we can address both functional and cosmetic concerns in one visit.?

The suite combines ocular aesthetics and advanced skincare to support tear film stability, reduce inflammation, and improve the skin?s appearance. A licensed esthetician with specialized training in dry eye therapies and facial rejuvenation leads all services.

Midwest Dry Eye Center offers a full menu of eye and skin treatments , including:

Signature facials like the Gala Glow Facial and Clear & Confident Facial

Radiofrequency facials, including the Timeless Beauty Facial with RF

Customized treatments for men, including Deep Cleansing and Balancing Facials

IRPL therapy packages targeting pigmentation, acne, and rosacea

Enzyme exfoliation, brow lamination, threading, tinting, and more

Eye enhancement bundles with hydrating eye masks and brow shaping

Premium skincare products from PCA Skin®, Life Line®, EltaMD®, and 20/20 Beauty

This expansion also supports patients with skin conditions that impact ocular health, including rosacea and other inflammatory skin conditions. Certain facials incorporate radiofrequency or light-based technology to help reduce inflammation, oil imbalance, and signs of fatigue all while stimulating collagen production.

?Our goal wasn?t to just add spa services,? Dr. Cohan explained. ?We wanted to create continuity between eye care and aesthetics. Treatments like IRPL and RF offer clinical benefits for both the skin and the tear film, which allows us to personalize care in a way that?s more effective and more comfortable.?

Patients can now schedule combined sessions that address both skincare and dry eye relief. IRPL light therapy, traditionally used to treat meibomian gland dysfunction, is also available in targeted skin packages to address pigmentation, redness, and scarring?maximizing results across both eye health and appearance.

The team performs services in a clean, clinical spa setting designed for patient comfort. The space combines a relaxing atmosphere with clinically informed protocols, reflecting Midwest Dry Eye Center?s emphasis on whole-face wellness and individualized care.

The launch of this new suite aligns with the broader mission of Midwest Dry Eye Center and Forsight Vision Care: to make long-term wellness accessible, results-driven, and rooted in medical expertise. With a team trained in both ocular treatment and advanced esthetics, patients no longer have to choose between relief and rejuvenation?they can receive both in one visit.

Patients seeking dry eye relief, cosmetic services, or both can now schedule combined appointments at the Northfield and Long Grove locations. For more information or to book a visit, call the office or go to
