

Amana Care Clinic - Davenport Offers Urgent Care Services to Meet Growing Demand

September 29, 2025

DAVENPORT, Iowa - September 29, 2025 -
Amana Care Clinic - Davenport has expanded its service capabilities and enhanced its digital healthcare offerings to better serve patients seeking alternatives to traditional hospital emergency room visits for non-life-threatening medical conditions. The Davenport health clinic has introduced new online visit capabilities that allow patients to consult with physicians and nurses remotely, complementing its existing online reservation system and walk-in services.

"Patients throughout the Quad Cities are discovering that urgent care provides a practical solution for non-emergency medical needs without the extended wait times and higher costs typically associated with hospital emergency departments," said Moutaz Kotob, PhD, representative for Amana Care Clinic. "Our expanded digital capabilities now enable patients to receive medical consultations from home, while those who prefer in-person care can simply walk in or reserve their spot online."

The expansion comes as more patients in the Quad Cities area seek convenient, affordable alternatives to

emergency room visits for minor medical issues. The urgent care clinic now offers extended hours seven days a week, operating Monday through Friday from 7:00 am to 7:00 pm, and weekends from 9:00 am to 4:00 pm on Saturdays and Sundays.

The clinic treats a comprehensive range of non-emergency medical conditions, including abrasions, burns, cold symptoms, ear infections, fractures, joint pain, muscle injuries, rashes, sinus infections, and urinary tract infections. The facility also provides sports physicals, full laboratory services, and X-ray diagnostics, offering patients a complete medical care experience in a single location.

The enhanced online visit feature differs from the clinic's reservation system by enabling real-time virtual consultations with healthcare providers. This dual approach provides patients with multiple convenient options for accessing medical care. The online reservation system allows patients to secure their place in line before arriving at the facility, while the virtual visit option eliminates the need to travel to the clinic for certain conditions.

"The integration of digital health services with our traditional walk-in model reflects our commitment to meeting patients where they are," added Dr. Kotob. "Whether someone needs immediate care for a minor injury or prefers to consult with a provider about symptoms from home, we have streamlined the process to make healthcare more accessible."

The clinic's walk-in model continues to serve as its foundation, eliminating the need for appointments or trips to the hospital and allowing patients to receive immediate care when health issues arise. This approach particularly benefits those whose primary care physicians are unavailable or when medical needs arise outside traditional office hours.

Amana Care Clinic operates multiple locations throughout the region, including facilities in Davenport and a newer location in Muscatine, Iowa, which opened in 2022. The organization focuses on providing efficient, compassionate, and quality medical care to residents throughout the Quad Cities area. The clinic maintains state-of-the-art facilities equipped with procedure and exam rooms, as well as comprehensive X-ray and laboratory equipment, staffed by certified professionals skilled in diagnosing and treating a wide range of urgent care needs.
