

GoMobileX Appoints Angie Oleson as President, Expands Mobile Fleet Services to Nocatee

September 23, 2025

September 23, 2025 -
GoMobileX, the innovative mobile car care company redefining vehicle maintenance with convenience and quality, proudly announces the appointment of Angie Oleson, MBA, as its new President, coinciding with the company?s expansion into the growing Nocatee area.

Oleson brings decades of experience in automotive service and fleet management, marking a pivotal step forward as GoMobileX scales operations and extends its fleet services and residential programs into new markets.

Prior to joining GoMobileX, Oleson served as General Manager and Business Lead at Firestone Direct, Bridgestone?s mobile service division, where she grew the business from concept to over $20 million in three years.

She led a fleet of more than 100 vans with a team of 200+ employees, maintaining a consistent Net Promoter

Score above 94%. Her extensive operational expertise and innovative, customer-first approach earned her recognition as a global leader within Bridgestone Americas.

?Angie?s experience building mobile-first service models for some of the biggest names in the industry makes her the perfect addition to our leadership team,? said Reagan Combs, Co-Founder of GoMobileX. ?She understands the evolving needs of fleet managers and brings a strong operational foundation that will allow us to scale with confidence.?

Co-Founder Kip Wellman added, ?Angie?s leadership will help accelerate our expansion into the fleet market while continuing to enhance the customer experience for the everyday driver. We?re thrilled to welcome her to the team.?

As President, Oleson will oversee GoMobileX?s national operations and strategic growth initiatives, with a sharp focus on expanding GoMobileX fleet services, which deliver preventative maintenance and repair solutions directly to fleet vehicles ? at the office, on job sites, or wherever they're parked.

?Fleet managers are seeking solutions that minimize vehicle downtime without sacrificing quality or safety,? said Oleson. ?GoMobileX offers an efficient, flexible, and scalable model to meet that demand, and I?m thrilled to join a team that?s truly innovating in the automotive service space.?

GoMobileX fleet services include mobile oil changes, tire services, brake repairs, battery replacements, inspections, and other preventative maintenance. The company now offers residential services in Nocatee of Northeast Florida, providing vehicle maintenance directly at homes and on-site for customers who prefer the convenience of at-home service.

These programs complement GoMobileX fleet services, allowing both individuals and businesses to receive expert care without leaving their property.

?Our goal has always been to simplify vehicle maintenance for everyone,? said Wellman. ?Expanding to Nocatee is a natural step in our growth, allowing us to serve more customers with the convenience they deserve.?

With Oleson at the helm, GoMobileX is actively growing its presence in South Florida and Nashville, with additional markets planned for 2026. The expansion into Nocatee strengthens GoMobileX?s reach and ensures customers across Northeast Florida can access timely, high-quality mobile auto services.

About GoMobileX

Based in Jacksonville, Florida, GoMobileX provides mobile car care and maintenance services directly to your home, office, or fleet yard. Offering both residential and fleet services, GoMobileX ensures vehicles receive expert care on-site, reducing downtime and eliminating the need to visit a traditional service center. From oil changes to tire services, brake maintenance, and battery replacement, GoMobileX delivers professional, convenient, and reliable automotive care. The company partners with Mobil 1 to provide premium oils and filters, giving customers confidence in consistent, high-quality service. For more information, visit www.gomobilex.com.
