## **Digital Spotlight Appointed by Above The Clouds to Lead Global Search Marketing Expansion**

*September 24, 2025*

Sydney, NSW - September 24, 2025 - PRESSADVANTAGE -

Australian fashion retailer, Above The Clouds, has selected Digital Spotlight to manage its comprehensive search marketing strategy as the brand accelerates its international e-commerce expansion. The partnership positions the Sydney-based digital marketing agency to oversee search engine optimization and paid advertising campaigns across multiple global markets.

The appointment comes as fashion retailers increasingly turn to data-driven marketing strategies to compete in the international marketplace. Above The Clouds, which has built a strong presence in the Australian market, seeks to replicate its domestic success through targeted digital marketing campaigns designed to reach new audiences across key international territories.

Digital Spotlight will implement a multi-channel approach encompassing search engine optimization, Google Ads management, and social media advertising across Instagram and Facebook platforms. The agency's mathematical approach to digital marketing, developed through managing campaigns for over 1,800

businesses across 355 industries, will be applied to Above The Clouds' expansion strategy.

"Fashion e-commerce requires precision targeting and a deep understanding of consumer behavior patterns across different markets," said Blake Horton, spokesperson for Digital Marketing Agency Digital Spotlight. "Our data-driven methodology allows us to identify and capitalize on opportunities that traditional marketing approaches might miss. For Above The Clouds, this means we can effectively position their brand in new markets while maintaining cost-effective customer acquisition."

The partnership reflects broader industry trends where established retailers are investing heavily in sophisticated digital marketing capabilities to compete with global e-commerce giants. Recent data indicates that fashion retailers allocating resources to advanced search marketing strategies have seen average international sales growth of 40 percent year-over-year.

The agency will leverage its proprietary statistical analysis methods to understand and adapt to algorithm changes across different search engines and social media platforms. This approach has enabled the company to maintain a 95.67 percent client retention rate while managing millions of dollars in advertising spend across diverse industries.

Above The Clouds' decision to partner with an Australian agency for its global expansion underscores the growing sophistication of the local digital marketing sector. Australian agencies have increasingly won international accounts, competing successfully against larger multinational firms through specialized expertise and innovative approaches.

As a Digital Spotlight Google Premier Partner, the agency brings certified expertise across search, display, video, and shopping campaigns. This Premier Partner status, held by only the highest tier of Google partners worldwide, provides Above The Clouds with access to advanced tools and direct Google support for their international campaigns.

Digital Spotlight specializes in evidence-based digital marketing strategies, offering services including search engine optimization, Google Ads management, Instagram and Facebook advertising, and Bing Ads management. Founded by mathematicians, the agency has developed advanced statistical models to optimize campaign performance and reduce customer acquisition costs for clients ranging from startups to established enterprises. The company maintains offices in Sydney and Newcastle, serving clients across Australia and internationally.
