A.E. Olsen Co., Inc. Service America Announces Expanded HVAC Services

October 07, 2025

SOUTHBURY, CT - October 07, 2025 -
A.E. Olsen Co., Inc. Service America, a Southbury-based heating and air conditioning contractor, announces the expansion of its comprehensive HVAC service portfolio to better serve residential customers throughout Connecticut. The company has enhanced its offerings to include advanced indoor air quality solutions and energy-efficient system retrofits alongside its established installation and maintenance services.

The expanded service lineup addresses growing demand for comprehensive climate control solutions as homeowners seek more efficient and reliable heating and cooling systems. The company now provides residential heating and air conditioning products, installation and replacement services, equipment retrofit and replacement, preventative maintenance programs, extended service agreements, extended warranties on new equipment, emergency service, indoor air quality specialist services, service for all makes and models, and custom sheet metal fabrication.

"Connecticut homeowners are increasingly concerned about energy efficiency and indoor air quality, especially as utility costs continue to rise," said Ryan Olsen, a representative of A.E. Olsen Co. "Our expanded services allow us to provide complete solutions that not only maintain comfortable temperatures year-round but also improve air quality and reduce energy consumption. We service all equipment makes and models, which means customers can rely on us regardless of their current system."

A.E. Olsen Co., Inc. Service America reviews consistently highlight the company's commitment to customer satisfaction and technical expertise. The company specializes in advanced technologies, including Carrier Geothermal systems, which utilize the earth's constant temperature to provide heating, cooling, and hot water. These systems offer significant energy savings compared to traditional HVAC equipment. Additionally, the company installs Hybrid Heat systems that combine heat pump technology with gas furnaces to optimize efficiency based on outdoor conditions.

Indoor air quality has become a primary focus for the company's service expansion. The team now offers Carrier Air Cleaner installations that capture airborne particles such as dust, pollen, and pet dander, creating healthier indoor environments for families. This service expansion comes as many homeowners spend more time indoors and seek ways to improve their home's air quality.

Regular maintenance remains a cornerstone of the company's service philosophy. Preventive maintenance programs help extend equipment lifespan, maintain energy efficiency, and prevent unexpected breakdowns. The company's extended service agreements provide customers with priority service and peace of mind, knowing their HVAC systems are professionally maintained throughout the year.

Based in Southbury, Connecticut, A.E. Olsen Co. has served the region's residential HVAC needs with a focus on comfort and cost-effectiveness. The company's certified technicians undergo continuous training on the latest HVAC technologies and installation techniques. Their unique approach combines traditional craftsmanship with modern technology to deliver reliable climate control solutions for homes of all sizes. The company maintains an active presence on social media, with A.E. Olsen Co., Inc. Service America Facebook providing updates on seasonal maintenance tips and energy-saving strategies for homeowners.
