

Emergency Service Pros Expands Restoration Services to New State

September 29, 2025

September 29, 2025 -
Emergency Service Pros, a Northern Colorado-based restoration company, has expanded its service territory to include Cheyenne, Wyoming, bringing professional fire and water damage restoration services to residents and businesses in the southeastern Wyoming region.

The expansion marks the first time the Severance-based company has extended operations beyond Colorado borders, responding to increased demand for certified restoration services in the Cheyenne area. The company will maintain its 24-hour emergency response capabilities for Wyoming clients while continuing to serve its established Northern Colorado service area.

"Expanding into Cheyenne represents a natural progression for our company as we've received numerous inquiries from Wyoming property owners seeking reliable restoration services," said Josh Patterson, Operations Director at Emergency Service Pros. "The proximity to our Northern Colorado operations allows us to maintain the same rapid response times and quality standards that our clients have come to expect."

The company specializes in Fire Damage Restoration, along with water damage cleanup, mold remediation, odor removal, and basement waterproofing services. All technicians serving the Wyoming expansion area are certified and licensed to handle both residential and commercial restoration projects.

Cheyenne property owners will have access to the same comprehensive services currently available to Northern Colorado clients, including immediate emergency response, insurance claim assistance, and post-mitigation consulting. The company's team works directly with insurance providers to streamline the claims process and ensure clear communication throughout restoration projects.

"We understand that property damage emergencies don't follow a schedule, which is why we're committed to providing round-the-clock availability to Cheyenne residents just as we do in Colorado," added Patterson. "Our goal is to minimize disruption and restore properties to their pre-damage condition as efficiently as possible."

The Wyoming expansion comes as demand for professional restoration services continues to grow across the region. Recent weather patterns and aging infrastructure have contributed to an increased need for emergency restoration services in both residential and commercial properties.

Emergency Service Pros maintains a fleet of specialized equipment and vehicles to handle large-scale restoration projects. The company's technicians receive ongoing training in the latest restoration techniques and safety protocols to ensure compliance with industry standards and regulations.

The company has built its reputation on providing transparent communication, free estimates, and working closely with property owners throughout the restoration process. Since its founding, the locally-owned company has maintained a strong focus on customer service and technical expertise.

Emergency Service Pros is a certified and licensed restoration company serving Northern Colorado and southeastern Wyoming. The company provides comprehensive restoration services, including water damage cleanup, fire damage restoration, mold remediation, odor removal, window well installation, and basement waterproofing for both residential and commercial properties. Based in Severance, Colorado, the company operates 24 hours a day, seven days a week for emergency response services.
